The Fiscal Theory of the Price Level John H. Cochrane, 2023-01-17 A comprehensive account of how government deficits and debt drive inflation Where do inflation and deflation ultimately come from The fiscal theory of the price level offers a simple answer Prices adjust so that the real value of government debt equals the present value of taxes less spending Inflation breaks out when people don t expect the government to fully repay its debts The fiscal theory is well suited to today s economy Financial innovation undermines money demand and central banks don t control the money supply or aggressively change interest rates invalidating classic theories while large debts and deficits threaten inflation and constrain monetary policy This book presents a comprehensive account of this important theory from one of its leading developers and advocates John Cochrane aims to make fiscal theory useful as a conceptual framework and modeling tool and for analyzing history and policy He merges fiscal theory with standard models in which central banks set interest rates giving a novel account of monetary policy He generalizes the theory to explain data and make realistic predictions For example inflation decreases in recessions despite deficits because discount rates fall raising the value of debt specifying that governments promise to partially repay debt avoids classic puzzles and allows the theory to apply at all times not just during periods of high inflation Cochrane offers an extensive rethinking of monetary doctrines and institutions through the eyes of fiscal theory and analyzes the era of zero interest rates and post pandemic inflation Filled with research by Cochrane and others The Fiscal Theory of the Price Level offers important new insights about fiscal and monetary policy

The 2006 pre-budget report Great Britain: Parliament: House of Commons: Treasury Committee,2007-01-25 This report from the Treasury Committee examines the recent economic analysis and assessment of the UK economy as outlined in the 2006 pre budget report and sets out a number of conclusions and recommendations including the Committee welcomes the recent rise in the growth rate of business investment but with the caveat that the downside risk as highlighted in a previous weakness for business investment remains unexplained that several risks exist around the consumption growth forecast including the potential of house prices to fall and the increase of personal insolvency the employment rate rise is commended but a lack of migration statistics in relation to the labour market means

an overall assessment is not possible although an improved forecast for economic growth in 2006 the Treasury has not forecast an improvement in the fiscal position the Government appears to be on track to meet the golden rule in the current economic cycle but will start the next economic cycle with its current budget in deficit the Committee recommends also that the Treasury in future Budgets and Pre Budget reports provide a fuller explanation of its current forecast of the start and end dates of the current economic cycle also future Budget and Pre Budget reports should provide a breakdown of reported efficiency gains by department and further to enhance transparency and enable effective scrutiny the Treasury should require departments in their departmental annual reports and Autumn Performance reports in 2007 and in later years to provide consistent and comprehensive information on progress against efficiency targets the Committee expressed dissatisfaction at the lateness and vagueness of information in relation to expenditure on education but approved the early announcement of capital spending plans for education up to 2010 11 the Committee though does welcome the Government's decision to commission and publish a range of reviews informing future economic policy including tax policy the Pre Budget report is seen as an effective instrument of fiscal consultation but this could be enhanced if Parliament and the public were given greater notice of the date of the report perhaps 4 weeks before the statement is due to be made where tax changes carry significant risk of forestalling activity or distorting market behaviour such as the unusual timing and implementation of the increases in Air Passenger Duty the Committee feels as a general rule that those increases should not come into force until the House of Commons has had an opportunity to come to a formal decision on such an increase
