Multimedia Security: Steganography and Digital Watermarking Techniques for Protection of Intellectual Property Lu, Chun-Shien, 2004-07-31 Multimedia security has become a major research topic yielding numerous academic papers in addition to many watermarking related companies In this emerging area there are many challenging research issues that deserve sustained study towards an effective and practical system This book explores the myriad of issues regarding multimedia security including perceptual fidelity analysis image audio and 3D mesh object watermarking medical watermarking error detection authentication and concealment fingerprinting digital signature and digital right management

Security on the Web Marvin Zelkowitz, 2011-07-08 Since its first volume in 1960 *Advances in Computers* has presented detailed coverage of innovations in computer hardware software theory design and applications It has also provided contributors with a medium in which they can explore their subjects in greater depth and breadth than journal articles usually allow As a result many articles have become standard references that continue to be of significant lasting value in this rapidly expanding field In depth surveys and tutorials on new computer technology Well known authors and researchers in the field Extensive bibliographies with most chapters Many of the volumes are devoted to single themes or subfields of computer science

Recent Developments in Computing and Its Applications M. Afshar Alam, Tamanna Siddiqui, K. R. Seeja, 2009 This book comprises of 74 contributions from the experts covering the following topics Information

Communication Technologies Network Technologies Wireless And Sensor Networks Soft Computing Circuits and Systems
 Software Engineering Data Mining Bioinformatics Data and Network Security Enhanced Methods in Computer Security, Biometric and Artificial Intelligence Systems Jerzy Pejas, Andrzej Piegat, 2006-07-18 Enhanced Methods in Computer Security Biometric and Artificial Intelligence Systems contains over 30 contributions from leading European researchers showing the present state and future directions of computer science research Methods of Artificial Intelligence and Intelligent Agents contains 13 contributions analyzing such areas of AI as fuzzy set theory predicate logic neural networks clustering data mining and others It also presents applications of AI as possible solutions for problems like firm bankruptcy soil erosion flight control and others Information Technology Security covers three important areas of security engineering in information systems software security public key infrastructure and the design of new cryptographic protocols and algorithms Biometric Systems comprises 11 contributions dealing with face picture analysis and recognition systems This chapter focuses on known methods of biometric problem solution as well as the design of new models Spatial Data on the Web Alberto Belussi, Barbara Catania, Eliseo Clementini, Elena Ferrari, 2007-08-15 Spatial data is essential in a wide range of application domains today While geographical applications remain the key target area spatial properties are required in other contexts such as computer aided design robotics and image processing Associated with these is the constantly growing number of distributed processing architectures based on for example grid systems sensor data networks and personalized smart devices Spatial Data on the Web links these two research streams focusing on the modeling and management of spatial data in distributed systems Belussi and his coeditors have structured the contributions from internationally renowned researchers into four parts Part I presents models for representing semistructured multiresolution and multiscale data Part II deals with the integration of spatial data sources Part III describes approaches to spatial data protection and finally Part IV reports innovative applications for mobile devices The book offers researchers in academia and industry an excellent overview of the state of the art in modeling and management of spatial data in distributed environments while it may also be the basis of specialized courses on Web based geographical information systems **Handbook of Database Security** Michael Gertz, Sushil Jajodia, 2007-12-03 Handbook of Database Security Applications and Trends provides an up to date overview of data security models techniques and architectures in a variety of data management applications and settings In addition to providing an overview of data security in different application settings this book includes an outline for future research directions within the field The book is designed for industry practitioners and researchers and is also suitable for advanced level students in computer science Proceedings of MAC-ETeL 2014 collective of authors, 2014-10-15 Proceedings of Multidisciplinary Academic Conference on Education Teaching and E learning in Prague 2014 Intelligent Interactive Multimedia Systems and Services George A Tsihrintzis, Ernesto Damiani, Maria Virvou, 2010-07-15 KES International KES is a worldwide organisation that provides a professional community and association for researchers originally in the discipline of
