 and Classroom Douglas Fisher, Nancy Frey, Ian Pumpian, 2012-04-26 What does it feel like to walk into your school Is it a  
 welcoming place where everyone feels valued Most school improvement efforts focus on academic goals instructional models  
 curriculum and assessments But sometimes what can make or break your learning community are the intangibles the  
 relationships identity and connections that make up its culture Authors Fisher Frey and Pumpian believe that no school  
 improvement effort will be effective unless school culture is addressed They identify five pillars that are critical to building a  
 culture of achievement 1 Welcome Imagine if all staff members in your school considered it their job to make every student  
 parent and visitor feel noticed welcomed and valued 2 Do no harm Your school rules should be tools for teaching students to  
 become the moral and ethical citizens you expect them to be 3 Choice words When the language students hear helps them  
 tell a story about themselves that is one of possibility and potential students perform in ways that are consistent with that  
 belief 4 It's never too late to learn Can you push students to go beyond the minimum needed to get by to discover what they  
 are capable of achieving 5 Best school in the universe Is your school the best place to teach and learn The best place to work  
 Drawing on their years of experience in the classroom the authors explain how these pillars support good teaching and  
 learning In addition they provide 19 action research tools that will help you create a culture of achievement so that your  
 school or classroom is the best it can be After reading this book you'll see why culture makes the difference between a school  
 that enables success for all students and a school that merely houses those students during the school day      Improving

**Using Quality Benchmarks for Assessing and Developing Undergraduate Programs** Dana S. Dunn, Maureen A. McCarthy, Suzanne C. Baker, Jane S. Halonen,2010-12-21 Using Quality Benchmarks for Assessing and Developing Undergraduate Programs Using Quality Benchmarks for Assessing and Developing Undergraduate Programs introduces selected performance criteria benchmarks to assist undergraduate programs in defining their educational goals and documenting their effectiveness The book explores the attributes of undergraduate programs by focusing on educationally related activities in eight domains program climate assessment accountability and accreditation issues student learning outcomes student development curriculum faculty characteristics program resources and administrative support Further it conceptualizes a continuum of performance for each attribute in each of the domains to characterize underdeveloped developing effective and distinguished achievement for undergraduate programs The goal of the book is to encourage individual departments at various types of institutions to evaluate what they currently do well while identifying areas for refinement or future growth When benchmarks reveal that a program is underdeveloped faculty and administrators can plan for how they can best direct subsequent efforts and resources to

improve a program's performance and ability to serve students. Emphasizing formative assessment over summative or punitive evaluation, the benchmarks in this book are designed to improve program quality, encourage more effective program reviews, and help optimally functioning programs compete more successfully for resources. Using performance benchmarks to identify areas of program strength can in turn be used to recruit and retain students, seek funding via grants or alumni support, and enhance the perceived rating of an institution.

**Sustainability for Healthcare Management** Carrie R. Rich, J. Knox Singleton, Seema S. Wadhwa, 2013-02-15 Sustainability is not unique to health but is a unique vehicle for promoting healthy values. This book challenges healthcare leaders to think through the implications of our decisions from fiscal, societal, and environmental perspectives. It links health values with sustainability drivers in order to enlighten leadership about the value of sustainability as we move toward a new paradigm of health. The authors explore leadership priorities and link them to sustainability through an imaginary health leader, Fred, the Chief Executive Officer (CEO) of Memorial Hospital, a community hospital based in the United States. Each chapter frames a leadership priority and accompanying sustainability driver through a storyline that involves the main character, Fred, and his colleagues. Practical applications featuring evidence-based sustainability accomplishments and the coordinating reflections of renowned healthcare leaders are woven throughout the book. Every chapter includes leadership tools, illustrations, and tables with tips and data to make an evidence-based case in support of health sustainability. Practical applications enhance each chapter by providing real examples of sustainability accomplishments, and reflections from healthcare leaders bring such examples to life. The book includes a healthcare sustainability syllabus as well as suggested reading and teaching resources. By bringing together the key concepts of environmentally sustainable healthcare operations, this book is a unique resource to researchers, students, and professionals working in health and healthcare management. Readers will also gain an appreciation for translating leadership priorities into sustainability tactics with beneficial operational outcomes.

**Dynamic Capacity Management for Healthcare** Pierce Story, 2010-12-08 While hospitals can learn from other industries, they cannot be improved or run like factories. With work that is more individualized than standardized and limited control over volume and arrivals, even the leanest-minded hospital must recognize that healthcare systems are more dynamic than nearly any work environment.
