productive system evolved in KIP and how public support for critical aspects accumulation of crop husbandry knowledge selection and supply of profitable varieties and mechanization of land preparation might have created a productive environment that the private sector could enter and fill in the market for credit processing mechanization of harvesting and other institutional voids that typically have constrained agricultural transformation in the rest of SSA Slower progress in other projects also raises a number of questions We conclude by summarizing those questions and some testable hypotheses for future research Miscellaneous Publication ,1988
