Handbook On Transport And Development:

International Handbook on Transport and Development R. Hickman, D. Bonilla, M. Givoni, D. Banister, 2015-08-28 In the last forty years or so the research field exploring the relationship and interaction between transport and development has developed rapidly While sophistication in analysis has increased understanding the effective integration of transport and development often remains poor in theory and in practice with sometimes devastating effects This Handbook provides a comprehensive analysis of both the current and emerging thinking in this field drawing on multidisciplinary thinking in transport planning transport urban and spatial economics and the wider social sciences With 45 chapters from leading international authors the book is organised around three main themes urban structure and travel transport and spatial impacts wider dimensions in transport and development The chapters each present commentary on key issues within these themes presenting the debate on the impacts of urban structure on travel the impacts of transport investment on development and social and cultural change on travel A multitude of competing inter disciplinary perspectives are considered leaving the reader with an invaluable comprehensive and critical understanding of the field This major Handbook will serve as a guide for undergraduates and graduate students researchers consultants and also practitioners and policy makers wishing to find a comprehensive and original reference to research on transport and development Contributors J A Annema F Avelino D Banister D Bonilla F Bruinsma C C Cantarelli X Jason Cao C L Chen G Cohen Blankshtain C Curtis G Dane J Dodson A Donald R Dowling M Echenique A El Geneidy R Ewing E Feitelson B Flyvbjerg N Garrick H Geerlings K Geurs M Givoni A R Goetz P Gordon A Grigolon D Halden P Hall I Hamiduddin S Handy P Headicar D A Hensher D Hidalgo R Hickman R Hjorthol M Hillman E Holden T Holvad H Holzapfel M Iacono O B Jensen P Jones J Kenworthy S Kenyon C A Klckner K J Krizek B Lee S Leleur D Levinson T Li Z Li K Linnerud S Marshall W Marshall E Matthies L Meija Dorantes R Meyfahrt P Mokhtarian J C Mu oz P Naess P Newman S Nordbakke S Petheram S Rasouli P Rietveld O Rotem Mindali T Schwanen N Sipe D Stead P Stoker G Stokes H Timmermans B Van Wee R Wilson D Yang

Urban Transport in the Developing World Harry T. Dimitriou, Ralph Gakenheimer, 2011-01-01 Policy making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability These challenges include coping with financial deficits providing for the poor dealing meaningfully with global warming and energy shortages addressing traffic congestion and related land use issues adopting green technologies and adjusting equitably to the impacts of globalisation This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn

Handbook on Transport and Urban Transformation in China Chia-Lin Chen, Haixiao Pan, Qing Shen, James J. Wang, 2020-03-28 Since 1978 when China embarked on a new period of economic reforms and introduced open door policies it has experienced a great urban transformation The role of transport has proved indispensable in this unprecedented rapid urbanisation and economic growth

As the first research focused book dedicated to this important topic the Handbook on Transport and Urban Transformation in China offers new insight into the various opportunities and challenges brought by fast paced motorization and urban development and explores them in broad spatial economic environmental social and institutional dimensions Handbook of Sustainable Transport Carey Curtis,2020-12-25 Exploring the need for a sustainable transport paradigm which has been sought after by local and national authorities internationally over the last 30 years this illuminating and timely Handbook offers insights into how this can be secured more broadly and what it may involve as well as the challenges that the sustainable transport approach faces The Handbook offers readers a holistic understanding of the paradigm by drawing on a wide range of research and relevant case studies that showcase where the principles of sustainable transport have been implemented

The Urban Rail Development Handbook Daniel Pulido,Georges Darido,Ramon Munoz-Raskin,Joanna Moody,2018-09-20 Cities across the globe are looking to develop affordable environmentally friendly and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development When appropriately planned and properly implemented as part of a larger public transportation network urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts High performing urban rail services when carefully approached as development projects can help enhance quality of life by giving citizens access to employment opportunities essential services urban amenities and neighboring communities The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning implementation and operations of urban rail projects with a view towards Emphasizing the need for early studies and project planning Making projects more sustainable economically

socially and environmentally Improving socioeconomic returns and access to opportunities for users Maximizing the value of private participation where appropriate and Building capacity within project implementing and managing institutions This Handbook provides experiential advice to tackle the technical institutional and financial challenges faced by decision makers considering urban rail projects It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international good practices and recommendations that are independent of commercial financial political or other interests The material presented is intended as an honest broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries Rather than identify a single approach this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions consider the key issues perform the necessary studies apply adequate tools and learn from international good practice all at the right time in the project development process

A Research Agenda for Transport Policy John Stanley, David A. Hensher, 2019 Everyone has an opinion on transport it significantly affects daily lives This book highlights key transport opportunities and challenges and identifies research requirements to inform policy discussion and support better societal outcomes It does this by scanning across modes continents technologies and socioeconomic settings looking for common threads points of difference and opportunities to make a difference The book should appeal to prospective post graduate students professionals in transport and related fields and those interested in better places and good discussions

A Companion to Transport, Space and Equity Robin Hickman, Beatriz Mella Lira, Moshe Givoni, Karst Geurs, 2019 With social inequity in urban spaces becoming an increasing concern in our modern world The Elgar Companion to Transport Space and Equity explores the relationships between transport and social equity Transport systems and infrastructure investment can lead to inequitable travel behaviours with certain socio demographic groups using particular parts of the transport system and accessing particular activities and opportunities

Air Transport and Regional Development Methodologies Anne Graham, Nicole Adler, Ofelia Betancor, Volodymyr Bilotkach, Enrique J. Calderón, Gianmaria Martini, Hans Martin Niemeier, António Pais Antunes, 2020-12-27 Air Transport and Regional Development Methodologies is one of three interconnected books related to a four year European Cooperation in Science and Technology COST Action established in 2015 The action called Air Transport and Regional Development ATARD aimed to promote a better understanding of how the air transport related problems of core regions and remote regions should be addressed to enhance both economic competitiveness and social cohesion in Europe This book discusses key methodological approaches to assessing air transport and regional development outlining their respective strengths and weaknesses These include input output analysis cost benefit analysis computable general equilibrium models data envelopment analysis stochastic frontier analysis discrete choice models and game theory Air Transport and Regional Development Methodologies aims at becoming a major reference source on the topic drawing from experienced researchers in the field covering the diverse experience and

knowledge of the members of the COST Action The book will be of interest to several large groups First it will serve as an authoritative and comprehensive reference for academics researchers and consultants Second it will advise policy makers and government organizations at European national and regional levels Third it presents invaluable insights to transport companies such as airports and airline operators Along with the other two books Air Transport and Regional Development Policies and Air Transport and Regional Development Case Studies it fills a much needed gap in the literature The Routledge Handbook of Transport Economics Jonathan Cowie, Stephen Ison, 2017-08-07 The Routledge Handbook of Transport Economics offers the first state of the art overview of the discipline of transport economics as it stands today reflective of key research and policy Transport is an important area of study and one which is problem rich stimulating a great deal of debate in areas which impact on everyday lives Much of this focuses on the practicalities of the modern day phenomenon of mass movement and all of the issues which surround it The discipline of economics is central to this debate and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation understand that and you alleviate the problem Featuring contributions from world leading scholars and practitioners from across the globe all of the chapters within this book are written from a practical perspective theory is applied and developed using real world examples The book examines concepts issues ideas and practicalities of transport provision in five key topic areas public transport public transport reform economic development and transport modelling transport and the environment freight transport A real strength of the book is in linking theory to practice and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living Practical and insightful this volume is an essential reference for any student or researcher working in all areas of transport provision ranging from planning appraisal regulation and freight and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation **Routledge Handbook of Transport in Asia** Junyi Zhang, Cheng-Min Feng, 2018-06-12 Asian transportation systems and services as well as their usage are fraught with challenges This handbook therefore seeks to examine the possible solutions to the problems faced by the region It illustrates the history of transportation development in Asia and provides a comprehensive overview of research on urban and intercity transport Presenting an extensive literature review and detailed summaries of the major findings and methodologies this book also offers suggestions for future research activities from top level international researchers Written from an interdisciplinary perspective the topics covered include Transportation systems across Asia Traffic accidents Air pollution Land use and logistics Transport governance Considering the population and economic development scale as well as the diverse cultures of Asia the Routledge Handbook of Transport in Asia will be a valuable resource for students and scholars of transportation Asian development and Asian Studies in general *Handbook on Transport and Land Use* João de

Abreu e Silva, Veronique Van Acker, Kristina M. Currans, Robert J. Schneider, 2023-06-28 Synthesizing current understandings on the relationship between transport and land use this timely Handbook proposes an agenda for research and practice that leads toward more human centered communities within an increasingly urbanized world facing rapid technological change. Leading scholars reframe and expand conventional transport policy holistically with concepts grounded in behavioral economic psychological and sociological theories in this fundamental reference work. Chapters explore the role of institutional policies and informal cultural contexts in influencing transport and land use systems before examining the impacts of transportation and land use decisions across multiple areas including equity public health climate environment and lifestyle preferences. The Handbook concludes by emphasizing pathways for human centered development planning and policy in an age of rapid innovation in new mobility technologies. Outlining the fundamental emerging and developing theories methods models and policies across the fields of transportation and land use this interdisciplinary Handbook will be invaluable to students and scholars of urban planning and transport studies. Setting an agenda for future research and policy initiatives it will also prove a useful resource to policymakers and practitioners working within transport and land use planning.

It also complements the textbook Principles of Transport Economics.

Transport Development in Asian Megacities Shigeru Morichi, Surya Raj Acharya, 2012-07-27 The rapid growth of the Asian urban population concentrates on a few large cities turning them into giant megacities. Despite new theoretical insights into the benefits of megacities the emerging Asia is facing a daunting challenge concerning the management of infrastructure and services in their megacities. The deteriorating urban mobility is the most difficult challenge with respect to the sharp increase in vehicle numbers and to inadequate and poorly managed road infrastructure. Public transport a sustainable mode of mobility is subjected to a vicious cycle of poor service decreasing ridership and lower investment. Despite

various policy initiatives the situation has not improved The scale and growth pattern of Asian megacities have distinctive features which generate a unique set of challenges and opportunities New perspectives are needed to effectively address the transportation problems making the best use of available opportunities This book which is a result of an international collaborative research addresses these challenges by providing insightful analysis and novel viewpoints *Air Transport and Regional Development Case Studies* Anne Graham,Nicole Adler,Hans-Martin Niemeier,Ofelia Betancor,António Pais Antunes,Volodymyr Bilotkach,Enrique J.
