Hands-On Exhibitions Tim Caulton,2006-04-14 The development of interactive displays has transformed the traditional museum world in the last decade Visitors are no longer satisfied by simply gazing at worthy displays in glass cases they expect to have hands on experience of the objects and be actively involved with the exhibits learning informally and being entertained simultaneously Hands on museums and science centres provide the most remarkable example of how museums are redefining their roles in society improving access to real objects and real phenomena so that they can be enjoyed by more people In recent years museums have been thrust into intense competition for the public s time and money with all branches of the leisure industry from commercial theme parks to retail shopping and home entertainment This has upset the traditional stability of the museum and their visitors A hands on approach encourages a broader visitor base which in turn helps to bring in additional revenue at a time of declining public subsidy Tim Caulton investigates how to create and operate effective exhibitions which achieve their educational objectives through hands on access He concludes that the continuing success of hands on museums and science centres hinges on attaining the very best practice in exhibition design and evaluation and in all aspects of operations including marketing and financial and human resource management Hands On Exhibitions provides a practical guide to best practice which will be indispensable to all museum professionals and students of museum studies

The Exhibition and Experience Design Handbook Timothy J. McNeil, 2023-04-04 Today's multi-modal participatory exhibitions and attractions are bound by a desire to convey information, excite the viewer and create social and narrative experiences. Without design at the helm and employed effectively, these experiential moments would not become lasting memories that inform and inspire an increasingly sophisticated audience. This full-color illustrated handbook, based on the author's research and expertise as an exhibition designer, educator and critic, is the first title to simultaneously explain how to design exhibitions and attractions successfully, contextualize contemporary exhibition design practice through its historical and theoretical underpinnings, elevate understanding of one of the most rapidly evolving and trans-disciplinary creative disciplines, illuminate exhibition design's contributions to the expanding global market for civic, cultural, commercial and entertainment experiences, and reframe the exhibition design process using a set of recurring tropes and the methods they employ, making this book distinct from other practice-based museological or commercially driven titles. This full-color book with over 250 photographs and drawings uses real-world examples, museum and exhibition design studio profiles, historical and contemporary voices, and draws on the author's own creative practice and exhibition-making experience, as well as contributions from his extensive network of international museum attraction and design professionals. The author introduces a new methodology for understanding exhibition and experience design. One that elevates understanding of one of the most rapidly evolving and trans-disciplinary creative disciplines. Twelve easy-to-follow illustrated chapters introduce a set of reoccurring exhibition design conventions or tropes that are omnipresent in exhibition making and can be used to chart a new methodology for understanding exhibition design and its process.

Indian Club Exercises and Exhibition Drills - Arranged for the Use of Teachers and Pupils in High School Classes, Academies, Private Schools, Colleges, Gymnasiums, Normal Schools, Etc. Henry B. Camann, 2020-12-01 Indian clubs or Iranian clubs belong to a category of exercise equipment used for developing strength and in juggling. In appearance, they resemble elongated bowling pins and are commonly made out of wood. They come in all shapes and sizes, however, ranging from a few pounds each to fifty pounds and are commonly swung in certain patterns as part of exercise programs. They were often used in class formats, predominantly in Iran, where members would perform choreographed routines led by an instructor, remarkably similar to modern aerobics classes. This work is a reprint of a classic publication on the use of Indian Clubs and

along with a brand new introduction includes a series of exercises to help you get in shape the old fashioned way
