mysteries such as who wrote the Unabomber Manifesto or theological mysteries such as if any of the Dead Sea Scrolls might have been forged by a modern author This method is uniquely accurate because it uses 27 different quantitative tests that measure a text's dimensions and its similarity or divergence to other texts automatically without the statisticians being able to skew the outcome by altering the experiment's analytical design Re Attribution guides researchers not only on how to perform the basic calculations but also how to perform the biographical and documentary research to derive who among the potential bylines in a single signature group is the ghostwriter while the others are merely ghostwriter contractors or pseudonyms Reliable accuracy is achieved by also performing other types of attribution tests to check if these alternative approaches validate or contradict the 27 tests findings Non quantitative tests discussed include deciphering the hidden implications of contemporary pufferies as well as comparing structural elements such as characters plot and element borrowings Part II presents a revised version of the history of the birth of the theater in Britain by reviewing forensic accounting evidence in Philip Henslowe's Diary and the documented history of homicidal lending practices and government corruption connected with troupes and theaters Parts III VIII explain precisely how this series derived that the British Renaissance was ghostwritten by only six linguistic signatures Richard Verstegan Josuah Sylvester Gabriel Harvey Benjamin Jonson William Byrd and William Percy The parts on each of these ghostwriters not only explain how their biographies fit with the timelines of the texts being attributed to them but also provide various types of evidence that explains their motives for ghostwriting And Part IX returns for an intricate analysis of a few pseudonyms or ghostwriting contractors who were uniquely difficult to exclude as potential ghostwriters in parallel these chapters question the reasons these individuals would have needed to purchase ghostwriting services The complete series on British Renaissance Re Attribution and Modernization by Anna Faktorovich is a remarkable accomplishment Based on her own unbiased method of computational linguistic authorial attribution she has critically examined an entire collection of texts many previously inaccessible and untranslated to modern English From a variety of distinct factors that have been ignored or unnoticed in the past she identifies a group of ghost writers behind many miss attributed Renaissance works Of particular interest are works traditionally attributed to William Shakespeare Dr Faktorovich is a prolific writer very well informed in English literature philology and literary criticism and she is clearly thorough and detail oriented Her re attribution and modernization series demonstrates solid scholarship fresh perspective and willingness to challenge conventional thought and methodology Midwest Book Review Lesly F Massey December 2021 I have long had an interest in linguistics and enjoy reading the frequent Who really wrote Shakespeare's works Therefore this book was extremely interesting to me So my recommendation is that if you have an interest in linguistics and scholarly research you will love this book Very interesting and well laid out book LibraryThing Early Reviewers February 2022 Anna Faktorovich PhD is an English professor who previously published Rebellion as Genre and Formulas of Popular Fiction She is also the Director and Founder of Anaphora Literary Press Reading and Writing
