Critical Multicultural Education

Christine E. Sleeter, 2024 Over time many people have come to understand and enact multicultural education in ways that evade grappling directly with racism. This collection addresses this problem with ten articles by Christine Sleeter that explicitly locate multicultural education within critical understandings of race, racism, and colonialism, offering both theoretical and practical discussions of what that means. *Elementary Mathematics Curriculum Materials* Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U.S. from three different perspectives: the mathematical emphasis, the pedagogical approaches, and how authors communicate with teachers. These perspectives comprise a framework for examining what curriculum materials are comprised of, what is involved in reading and interpreting them, and how curriculum authors can and do support teachers in this process. Although the focus of the analysis is 5 programs used at a particular point in time, this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general. Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks, cognitive demand, and ongoing practice, and the way representations are used. Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics, one another, the teacher, and the textbook around these mathematical ideas, as well as the role of the teacher. In order to examine how curriculum authors support teachers, we analyze how they communicate with teachers and what they communicate about, including the underlying mathematics, noticing student thinking, and rationale for design elements. The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors. *Unlocking Multilingual Learners' Potential* Diane Staehr Fenner, Sydney Snyder, Meghan Gregoire-Smith, 2024-01-10 Bring classroom content to life for multilingual learners. With fresh graphics and eye-catching colors, this thoroughly revised edition also includes Considerations for newcomers and students with interrupted or no formal education; SLIFE; An added chapter on building scaffolded instruction and peer learning opportunities into MLs' academic reading and writing activities; Additional opportunities for reflection and application; A new unit planning template aligned with research-based instructional practices, including a completed example unit; Situated within five core beliefs that frame the must-haves for MLs' equitable and excellent education; *Unlocking Multilingual Learners' Potential* is a guide to research-based practices and a toolbox of strategies every educator can implement to make content accessible and increase language proficiency among MLs. *Teaching Language and Literature* Walter Loban, Margaret A.
