Publication ,1997 *Recarbonizing global soils - A technical manual of recommended management practices* Food and
Agriculture Organization of the United Nations,Intergovernmental Technical Panel on Soils,2021-09-08 During the last
decades soil organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil
science as it was proven to be one of the most crucial components of the earth s climate system which has a great potential
to be managed by humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in
particular Goal 15 Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat
desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in
Indicator 15.3.1 This technical manual is the first attempt to gather in a standardized format the existing data on the impacts
of the main soil management practices on SOC content in a wide array of environments including the advantages drawbacks
and constraints This manual presents different sustainable soil management SSM practices at different scales and in
different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC
stocks and successful experiences of SOC sequestration in practical field applications Volume 4 includes 51 case studies
dealing with cropland grassland integrated systems and farming approaches **Directions of Development of Transport**
Networks and Traffic Engineering Elżbieta Macioszek,Grzegorz Sierpiński,2018-07-30 This book offers a collection of
valuable guidelines for making decisions concerning the future development of transport networks and traffic engineering
The decision making support systems described here will certainly attract the interest of those who face the challenge of
finding solutions to problems concerning modern transport systems on a daily basis Consequently the book is chiefly
intended for local authorities involved in planning and preparing development strategies for specific transport related areas
in both urban and regional contexts as well as for representatives of business and industry who are directly engaged in the
implementation of traffic engineering solutions The guidelines provided in the respective chapters help to address the given
problem soundly and to simplify the selection of an appropriate strategy The topics covered include increasing the
competitiveness of public transport the status quo of electric vehicle infrastructures worldwide methods for calming urban

traffic as an element of sustainable transport development speed traffic zones and electric buses car sharing systems in Poland a method for deconstructing the regional travel demand model monitoring urban traffic using floating car data problems of deliveries in urban agglomeration distribution systems estimating the number of threatened people in case of fire in road tunnels and road pavement evaluation using advanced tools Since the book also considers new approaches to theoretical models including traffic flow surveys and measurements transport behaviors human factors in traffic engineering and road condition modeling it will also appeal to researchers and scientists studying these problems The book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organized by the Department of Transport Systems and Traffic Engineering Silesian University of Technology in Katowice Poland on September 17 19 2018
