Rossmore, 1994-12-31 My professional interest in antimicrobial agents and contamination control goes back 50 years to my tour as a microbiologist in a field hospital in Europe during World War II With no experience and relying solely on a military handbook I prepared thermometer trays with jars of blue bichloride of mercury and pink isopropyl alcohol A preliminary typhoid diagnosis of one of our cooks resulted in the need for lab testing His stool specimen and its subsequent disposal was my problem My handbook said bum it So burn it I did in a five gallon can with gasoline Flames shot up almost six feet and my next mistake was to extinguish them with carbon tetrachloride This resulted in the production of lethal phosgene gas The hospital had a near disaster I could say that at that moment I vowed to write a how to book so that such stupidities could be avoided Nevertheless when I was offered the opportunity to edit this book I thought back on the need for a real practical treatment of my subject This book then is a practical handbook for technical service personnel and scientists who are not necessarily specialists in microbiology It provides information on suitable antimicrobial agents appropriate to their particular problem solving needs and information on the microbial groups contributing to the specific problem their ecologies and strategies for controlling their access to the area or material of interest *Hazardous Waste Handbook* John Lippitt, Paul Webb, William Martin, 2000-10-05 Hazardous Waste Handbook 3E offers a straightforward approach to protecting workers who clean up the nation's hazardous waste sites and chemical spills Supervisors and site inspectors will find this handbook very useful in answering occupational health questions at the work site The manual covers such topics as site characterization air monitoring personal protective equipment decontamination and site emergencies Numerous health and safety checklists hazardous chemical data sheets and personal protective equipment recommendations
