single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny

Child Therapy in the Great Outdoors Sebastiano Santostefano, 2013-04-15 Building on relational conceptualizations of enactment and on developmental research that attests to the role of embodied nonverbal language in the meanings children impute to their experiences Sebastiano Santostefano offers this compelling demonstration of effective child therapy conducted in the great outdoors Specifically he argues that for the child traumatic life metaphors should be resolved at an embodied rather than an exclusively verbal level they should be resolved that is as they are enacted between child and therapist To this end child and therapist must take advantage of all the indoor and outdoor environments available to them As they take therapy to nontraditional places relying on the nonverbal vocabulary they have constructed together they move toward enacted solutions to relational crises solutions that revise the child's sense of self and ability to form new and productive relationships
