Natural Bank Reliance Hannah L Winterberg,2025-06-13 The higher aggregate prevalence of loan over bond funding in Europe is not only driven by the well documented differences in financial market settings but also strongly shaped by different firm characteristics The European economy is more fragmented than the U S economy and thus features a different firm distribution in terms of size and collateral availability I estimate that if all European firms had access to a financial market like the U S market their aggregate bond funding share would remain significantly smaller This counterfactual suggests a limited potential for European corporate bond markets in the short and medium term
