Public Expenditures and Environmental Protection Gunnar S. Eskeland,2000 Pigou s conjecture was that under costly taxation public expenditures should not reach the point where marginal benefits equal marginal costs In the treatment here public expenditures and environmental protection may provide public goods for consumption but also collective inputs for

production When the benefits are in production the cost of funds is irrelevant Why Collective inputs benefit goods that are taxed while for public goods the shadow price of funds reduces provision as if they were

Economic Reform Processes in South Asia Philippa Dee, 2012-07-26 While South Asia's economic reform initiatives of the last two decades were often born in crisis this alone does not account for their occurrence This book looks at the processes and institutional arrangements behind these reforms and analyses what lessons can be learnt about how South Asia can improve its policy efficiency The book develops ideas about how to overcome the political restraints to reform by drawing on recent theories of political economy and policy learning It tests these ideas against authoritative case studies of actual reform initiatives in South Asia which illustrate processes and institutional arrangements that have helped South Asian governments to sustain reform efforts even in the absence of a strong political base This offers valuable lessons for the global economy as it moves into a phase of rebalancing with the structural adjustments that this will require The book goes on to identify weaknesses that could be addressed by South Asian national governments and regional forums It is an important

contribution to studies on South Asian Politics and International Political Economy

Can the Poor Save? Michael Sherraden, 2017-09-08 Many policymakers argue that the best poverty policy not only provides cash to the poor for subsistence but also incentives and structures that encourage long term social and economic improvement As part of this they make the case for Individual Development Accounts IDAs a new policy proposal designed to help the poor save and to build assets This book explores IDAs to determine their effectiveness IDAs are matched savings accounts targeted on low income low wealth individuals Savings in IDAs are used for home ownership post secondary education small business development and other purposes Do IDAs work If they do for whom And does how an IDA is designed determine savings outcomes This volume is the first analysis of matched savings by the poor to use data from monthly bank statements It comes at a critical time as debate rages over the merits of individual social security accounts IDAs also respond to policy that is becoming more asset based and less inclusive of the poor The authors argue for the efficacy of IDAs to counter this tendency They find that while savings outcomes vary among participants no characteristics such as low income or public assistance preclude saving They examine effects of IDA design the match rate savings targets and the use of automatic transfer on savings results and analyze factors that influence varying rates of saving and spending over time They conclude that financial education and other support services though costly improve savings performance To address the issue of cost they suggest a two tier system of IDA design one with broad access and simple services and the other with targeted access and intensive services Can the Poor Save offers a wealth of lessons to those interested in saving and asset accumulation among the poor It not only breaks new ground in the scientific study of savings behavior but also offers concrete evidence based recommendations to improve policies designed to encourage the poor to save and how to make such policies more inclusive

Full Industry Equilibrium Arrigo Opocher, Ian Steedman, 2015-05-28 This highly original book develops a systematic zero net profit comparative statics theory of the firm that challenges many widely held views in microeconomics It builds a bridge between the marginalist long run theory of the firm and Sraffian theory to create a unified theoretical framework that explains how firms react to exogenous shocks resulting in new equilibrium positions of the whole economy The central message of the book is that too often economists expect more from the microeconomic laws of input demand and output supply than they can really give The authors show that the zero net profit condition requires a more articulated analysis that sometimes yields qualitative results contrary to those of familiar economic laws Written for academic researchers and graduate students the book will be of particular interest to those working on the microeconomics of industry equilibrium comparative statics and Sraffian economics

An Agency Theory of Dividend Taxation Raj Chetty, Emmanuel Saez, 2007 Recent empirical studies of dividend taxation have found that 1 dividend tax cuts cause large immediate increases in dividend payouts and 2 the increases are driven by firms with high levels of share ownership among top executives or the board of directors These findings are inconsistent with existing old view and new view theories of

dividend taxation We propose a simple alternative theory of dividend taxation in which managers and shareholders have conflicting interests and show that it can explain the evidence Using this agency model we develop an empirically implementable formula for the efficiency cost of dividend taxation The key determinant of the efficiency cost is the nature of private contracting If the contract between shareholders and the manager is second best efficient deadweight burden follows the standard Harberger formula and is second order small despite the pre existing distortion of over investment by the manager If the contract is second best inefficient as is likely when firms are owned by diffuse shareholders because of incentives to free ride when monitoring managers dividend taxation generates a first order large efficiency cost An illustrative calibration of the formula using empirical estimates from the 2003 dividend tax reform in the U S suggests that the efficiency cost of raising the dividend tax rate could be close to the amount of revenue raised **Free Lunch Thinking** Tom Bergin, 2021-01-28 Countries with smaller governments grow faster Tobacco taxes are the best way to cut smoking Government regulation discourages entrepreneurship Award winning investigative journalist Tom Bergin digs into eight mantras widely accepted by Western governments and by talking to the people who promote those ideas and the workers businesspeople and consumers who have felt their impacts finds they often don't play out as expected Smart funny and incisive Free Lunch Thinking is essential reading for anyone who really wants to know how economies tick and why they often don't _____ I couldn't put it down A thorough and nuanced examination of the evolution of supply side economics I loved it Arthur Laffer creator of the Laffer Curve An entertaining and thought provoking exploration of economic theories that have been both widely accepted and largely wrong I devoured it in a couple of sittings Reuters Breakingviews An insightful account of the recent history of economic thought If you are looking for a book which challenges you without being annoying make it this one Institute of Economics Affairs Public Finance in a Changing World Peter Birch Sorensen, 1998-04-15 This non technical volume analyses topical problems of public finance in a changing world characterized by growing mobility of production factors liberalized economic policy regimes and the formation of new nations It discusses alternative views of government and the way we measure its activities the modern welfare state and its impact on entrepreneurship and employment issues of fiscal coordination and income redistribution in a world with many jurisdictions and the problems of raising government revenue and of allocating property rights in transition economies
