*Food Colour and Appearance* Hutchings, 2012-12-06 Much of man's behaviour is controlled by appearance but the appearance of his food is of paramount importance to his health and well being In day to day survival and marketing situations we can or not most foods are fit to eat from their optical tell whether properties Although vision and colour

perception are the means by which we appreciate our surroundings visual acceptance depends on more than just colour It depends on total appearance In the recent past the food technologist has been under pressure to increase his her understanding of first the behaviour of raw materials under processing and second the behaviour and motivation of his her customers in a growing more discriminating and worldwide market The chapters which follow describe the philosophy of total appearance the factors comprising it and its application to the food industry Included are considerations of the evolutionary historical and cultural aspects of food appearance the physics and food chemistry of colour and appearance the principles of sensory appearance assessment and appearance profile analysis as well as instrumental measurement the interaction of product appearance control and acceptance in the varied environments of the laboratory production line supermarket home and restaurant A broad examination has been made in an attempt to get into perspective the importance of appearance to all sectors of the industry

Addressing the Unmet Needs of Cataract Patients: When Quality of Vision Can Make the Difference in Quality of Life Rita Mencucci, Eleonora Favuzza, Filomena Ribeiro, 2023-10-13 Due to the ageing population the need for cataract surgery is increasing very steeply in line with demographic change Cataract surgery is a highly successful and cost effective intervention but the implantation of conventional monofocal intraocular lenses IOLs only allows a restoration of distance vision with minimal postoperative functionality of near and intermediate vision which are necessary for many common daily tasks Although the removal of the opacified crystalline lens has been demonstrated to have a very positive impact on the mental health daily functioning and Quality of Life QoL of patients it is not surprising that the poor visual restoration achieved with conventional monofocal IOLs at different near and intermediate distances might limit patient functioning and consequently QoL considering changing lifestyles and increased working years Therefore this has led to a growing interest toward IOLs that may also reduce spectacle dependence for intermediate and near distances
