Monthly Catalog of United States Government Publications, 1995-10 **Silent Inspector User's Manual** Jeffrey M. Cox, Paul Maresca, Andrea Jarvela, 1995 **Screening for Depression and Other Psychological Problems in Diabetes** Cathy E. Lloyd, Frans Pouwer, Norbert Hermanns, 2012-08-12 This book is divided into two main sections and covers a broad range of issues important for health practitioners to be aware of when caring for people with co morbid diabetes and depression Section One of the book contains the overall ideas and the more recent developments in measuring psychological morbidity in people with diabetes When attempting to identify people with depression or other psychological problems it is important for practitioners to recognize the limitations of screening as well as its utility Issues such as the basic principles regarding when and when not to screen the cultural applicability of tools different questionnaire formats and key concepts such as sensitivity and specificity of tools and their positive and negative predictive value will be considered In particular there has been increased interest in the concept of diabetes related distress and several tools have been developed to measure this There are broad based measures of distress such as the Problem Areas in Diabetes PAID scale the Diabetes Adjustment Scale DAS The Diabetes Health Profile The Fear of Hypoglycemia Scale etc There are also a range of generic quality of life tools which have been used effectively in people with diabetes for example the Medical Outcomes Survey Short Forms SF36 SF12 the World Health Organisation Well being questionnaire WHO 5 and the EQ5 D These tools are important because they measure aspects of psychological well being that are specifically associated with the experience of having a long term conditions and so have important implications for both self care and health care practice The potential overlap of symptoms of depression and symptoms of diabetes related distress are considered in this section and the implications for practice discussed Section Two covers the most commonly used tools that have been used to screen for depression For each tool considered some information which is easily referred to by the reader is set out in a table which includes details of the authors time of first use country where it was first developed some examples of the questions used the languages it is available in data on sensitivity specificity Each instrument will then be discussed in terms of its use in research as well as practice and its applicability in different patient groups different cultural settings and so on Guidance on the practical use of each tool is included and the most popular depression screening tools are focussed on **Review of the New York City**

Watershed Protection Program National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Water Science and Technology Board, Committee to Review the New York City Watershed Protection Program, 2021-01-04 New York City's municipal water supply system provides about 1 billion gallons of drinking water a day to over 8.5 million people in New York City and about 1 million people living in nearby Westchester Putnam Ulster and Orange counties. The combined water supply system includes 19 reservoirs and three controlled lakes with a total storage capacity of approximately 580 billion gallons. The city's Watershed Protection Program is intended to maintain and enhance the high quality of these surface water sources. Review of the New York City Watershed Protection Program assesses the efficacy and future of New York City's watershed management activities. The report identifies program areas that may require future change or action including continued efforts to address turbidity and responding to changes in reservoir water quality as a result of climate change.
