Learning and Teaching Dirk Ifenthaler, David Gibson, 2020-08-10 The book aims to advance global knowledge and practice in

applying data science to transform higher education learning and teaching to improve personalization access and effectiveness of education for all. Currently higher education institutions and involved stakeholders can derive multiple benefits from educational data mining and learning analytics by using different data analytics strategies to produce summative, real time and predictive or prescriptive insights and recommendations. Educational data mining refers to the process of extracting useful information out of a large collection of complex educational datasets while learning analytics emphasizes insights and responses to real time learning processes based on educational information from digital learning environments, administrative systems and social platforms. This volume provides insight into the emerging paradigms, frameworks, methods and processes of managing change to better facilitate organizational transformation toward implementation of educational data mining and learning analytics. It features current research exploring the a) theoretical foundation and empirical evidence of the adoption of learning analytics, b) technological infrastructure and staff capabilities required as well as c) case studies that describe current practices and experiences in the use of data analytics in higher education.

Adaptive Educational Technologies for Literacy Instruction Scott A. Crossley, Danielle S. McNamara, 2016-06-17

While current educational technologies have the potential to fundamentally enhance literacy education, many of these tools remain unknown to or unused by today's practitioners due to a lack of access and support. *Adaptive Educational Technologies for Literacy Instruction* presents actionable information to educators, administrators and researchers about available educational technologies that provide adaptive, personalized literacy instruction to students of all ages. These accessible, comprehensive chapters written by leading researchers who have developed systems and strategies for classrooms introduce effective technologies for reading comprehension and writing skills.

Advancing Human Assessment Randy E. Bennett, Matthias von Davier, 2017-10-17

This book is open access under a CC BY-NC 2.5 license. This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology and validity. Many of the developments presented have become de facto standards in educational and psychological measurement, including item response theory, IRT linking and equating, differential item functioning, DIF and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of International Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental and social psychology and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement.

evaluation scientific psychology and education policy analysis Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70 year history the book is a useful resource for all interested in the improvement of human assessment
