Executive Function and Education Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child's social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success

Executive Function(s): Conductor, Orchestra or Symphony? Towards a Trans-Disciplinary Unification of Theory and Practice Across Development, in Normal and Atypical Groups Lynne A. Barker, Nicholas Morton, 2018-08-30 There are several theories of executive function s that tend to share some theoretical overlap yet are also conceptually distinct each bolstered by empirical data Norman and Shallice 1986 Shallice Stuss and Alexander 2007 Burgess Gilbert Burgess Miyake et al 2000 The notion that executive processes are supervisory and most in demand in novel situations was an early conceptualization of executive function that has been adapted and refined over time Norman Shallice 2001 Burgess Gilbert ii automatic orientation towards stimuli in the environment or internally driven thought Burgess Gilbert iii the automatically generated interface between tacit processes and strategic conscious thought Barker Andrade Romanowski Morton and Wasti 2006 Morton and Barker 2010 and iv distinct but interrelated executive processes that maintain update and switch across different sources of information Miyake et al 2000 One problem is that executive dysfunction or dysexecutive syndrome Baddeley Eslinger Barker Andrade Andr s Chevignard et al 2000 Cripe 1998 Fortin Godbout Lamberts Evans Barker Morton Morrison McGuire 2011 Complete elimination of environmental confounds runs the risk of generating results that cannot be generalized beyond constrained circumstances of the test environment Barker Andrade Burgess et al 2006 Finally translational issues also confound executive function research across different disciplines psychiatry cognitive science and developmental psychology and across typically developing and clinical populations including Autism Spectrum Disorders Head Injury and Schizophrenia Blakemore Taylor Barker Heavey McHale 2013 Consequently there is a need for unification of executive function approaches across disciplines and populations and narrowing of the conceptual gap between theoretical positions clinical symptoms and measurement
