Handbook For Evaluating Infrastructure Regulatory Systems:

Handbook for Evaluating Infrastructure Regulatory Systems Ashley C. Brown, Jon Stern, Bernard William Tenenbaum, 2006 Provides an analytical framework and supporting instruments for evaluating the performance of new infrastructure regulators in developing countries This handbook argues that an evaluation must examine both regulatory governance the how of regulation as well as regulatory substance the what of regulation *Handbook for Evaluating Infrastructure Regulatory Systems* Ashley C. Brown, Jon Stern, Bernard William Tenenbaum, Defne Gencer, 2006-01-01 More than 200 new infrastructure regulators have been created around the world in the last 15 years They were established to encourage clear and sustainable long term economic and legal commitments by governments and investors to encourage new investment to benefit existing and new customers There is now considerable evidence that both investors and consumers the two groups that were supposed to have benefited from these new regulatory systems have often been disappointed with their performance The fundamental premise of this book is that regulatory systems can be successfully reformed only if there are independent objective and public evaluations of their performance Just as one goes to a medical doctor for a regular health checkup it is clear that infrastructure regulation would also benefit from periodic checkups This book provides a general framework as well as detailed practical guidance on how to perform such regulatory checkups Infrastructure Regulation Darryl S. Regulators,2007-11-13 UK economic Regulators 1st report of session 2006 07 Vol 2 Evidence Africa's Power Infrastructure Orvika Rosnes,Maria Shkaratan,2011 Africa s Power Infrastructure Investment Integration Efficiency is based on the most extensive data collection exercise ever undertaken on infrastructure in Africa the Africa Country Infrastructure Country Diagnostic AICD Data from this study have provided new insights on the extent of a power crisis in the region characterized by insufficient capacity low electricity connection rates high costs and poor reliability and on what can be done about it The continent faces an annual power sector financing gap of about 21 billion with much of the existing spending channeled to maintain and operate high cost power systems leaving little for the huge investments needed to provide a long term solution Meanwhile the power crisis is taking a heavy toll on economic growth and productivity This book asserts that the current impediments to economic growth and development need to be tackled through policies and investment strategies that renew efforts to reform state owned utilities build on the lessons of private participation in infrastructure projects retarget electrification strategies expand regional power trade and mobilize new funding resources Further development of regional power trade would allow Africa to harness larger scale and more cost effective energy sources reducing energy system costs by US 2 billion and carbon dioxide emissions by 70 million tons annually But reaping the promise of regional trade depends on a handful of major exporting countries raising the large volumes of finance needed to develop generation capacity for export it also requires a large number of importing countries to muster the requisite political will With increased utility efficiency and regional power trade in play power costs would fall and full cost recovery tariffs could become affordable in much of Africa This will make utilities more creditworthy and help sustain the flow of external finance to the sector which is essential to close the huge financing gap **Mini Grid Solutions for Underserved Customers** Bernard Tenenbaum,Chris Greacen,Ashish Shrestha,2024-03-06 Mini grids are serving communities with existing but unreliable main grid connections by providing dependable electricity when the main grid fails The success of mini grids hinges on commercial technical and regulatory frameworks designed to achieve win win win outcomes for consumers distribution companies and private developers **OECD Economic Surveys: Indonesia 2010** OECD,2010-11-01 This 2010 edition of OECD s periodic survey of the Indonesian economy includes chapters covering achieving sustainable and inclusive growth phasing out energy subsidies tackling the infrastructure challenge and enhancing the effectiveness of social policies Grid for growth Kanishk Chaudhry,2023-12-07 The Grid for Growth is a comprehensive exploration of the complex evolution of the Indian power sector delving into the policy shifts regulatory frameworks and technological advancements that have shaped its trajectory The book offers a nuanced analysis of the challenges and opportunities associated with transforming the country s power sector shedding light on the impact of privatization renewable energy integration and the role of government initiatives in driving sustainable and inclusive growth With a keen focus on the interplay between economics politics and environmental sustainability this seminal work serves as a vital resource for scholars policymakers and stakeholders seeking to understand

the dynamics of India's power sector reforms and their implications for the nation's energy landscape. The views expressed in the book are the author's personal views and not those of the Government. **Regulation in Practice** Anjali Garg, J. L. Bajaj, 2007-01-01. This publication focuses on the impact of tariff orders distribution issued by nine SERCs state electricity regulatory commissions in India during 2003-04, 2004-05 and 2005-06. The states covered are Andhra Pradesh, Assam, Delhi, Jharkhand, Kerala, Madhya Pradesh, Maharashtra, Uttarakhand and West Bengal. The analysis has been undertaken based on data and information available up to January 2007. The book assesses whether the orders have resulted in reducing regulatory uncertainty and information asymmetry and led to better performance of the distribution utilities. Different indicators have been used to assess the impact on consumption and access, efficiency, financial performance, competition and consumer related issues in the power sector of these states. In addition, various parameters have been studied to assess whether the regulatory systems follow the principles of good regulation in these nine states. The commercial loss without subsidy incurred by state power utilities increased from Rs 197.220 million in 2003-04 to Rs 221.290 million in 2004-05. In view of the huge losses being incurred by the utilities, the tariff determination function forms a central part of the reform process. A comprehensive survey of tariff orders issued by these SERCs for the distribution licensees has been undertaken to evaluate the effectiveness of regulatory orders in the electricity sector. It assesses whether the orders have resulted in reducing regulatory uncertainty and information asymmetry and better performance of the distribution utilities. However, tariff orders are only one index of effectiveness of the regulatory commissions. It is recognized that there are many other important functions of the SERCs besides tariff setting and some of them have also been covered in this study. In addition, other documents available in the public domain including the Power Sector Rating Report prepared by the Ministry of Power, Annual Report on the Regulation in practice, impact of tariff orders on the Indian electricity sector, Working of State Electricity Boards and Electricity Departments 1 and the Report on Restructuring of APDRP Accelerated Power Development and Reform Programme 2 were also studied. **Russian Electricity and Energy Investment Law** Anatole Boute, 2015-08-11. Electricity supply plays a strategic role for Russia's economic development and for social peace. As a main consumer of natural gas, electricity is also of central importance for the efficient management of Russia's energy resource base. Today, however, the electricity sector is in an obsolete condition. Investments are needed in the modernization of the infrastructure. This book analyzes the liberalization and privatization program that Russia is implementing to attract private investments in this modernization process. Taking a comparative approach, this analysis critically assesses Russian electricity law in the light of the European liberalization experience. Given the strategic importance of electricity, investors face significant risks of government intervention. This book identifies these regulatory risks and examines investment protection mechanisms under Russia's national and international investment obligations. **Public and Private Participation in the Water and Wastewater Sector** Cledan Mandri-Perrott, 2009-03-09.
