Les privatisations de l'éducation - Revue internationale d'éducation sèvres 82 - Ebook CIEP, 2020-02-19 Les processus de privatisation en éducation et de l'éducation concernent désormais la plupart des pays du monde. Dans un contexte de mondialisation et d'internationalisation accrues des systèmes éducatifs, la mise en œuvre ces dernières décennies de mesures spécifiques de privatisation, le développement d'un secteur marchand de l'éducation, mais aussi des évolutions sociétales de fond concernant les notions d'individualisme et d'individu, interrogent d'une nouvelle manière les enjeux liés aux privatisations. La promotion des intérêts privés est-elle compatible avec un processus d'éducation ? Induit-elle irrémédiablement, par exemple, une conception utilitariste de l'éducation ? Quel est son impact sur les nouvelles générations et leur capacité à faire société ? Finalement, les privatisations en cours de l'éducation en changeant-elles la nature ou ne s'agit-il que d'une différence de modalités d'organisation ou de gouvernance ? Pour répondre à ces questions, ce dossier rassemble les contributions de treize chercheurs en éducation spécialistes mondiaux réputés ou auteurs d'enquêtes pionnières dans leur domaine, dont les travaux permettent d'envisager une grande diversité de cas : Angleterre, Chili, Côte d'Ivoire, États-Unis, France, Inde, Suède. Il met également en évidence des problématiques transversales de nombreux pays, comme le développement du soutien scolaire privé en Asie ou les stratégies mises en œuvre par des entreprises privées pour influencer les politiques éducatives. Quelle que soit la définition retenue, tous les auteurs soulignent la croissance sans précédent de la privatisation ces dernières années. Illustrer cette diversité est l'un des objectifs majeurs de ce dossier, qui donne à voir trois principales formes de privatisation, non exclusives et clairement liées les unes aux autres : une privatisation par le biais de politiques publiques spécifiques, une privatisation par le marché et une privatisation par une prise en compte croissante d'aspirations et d'intérêts individuels privés. Un dossier coordonné par Thierry Chevaillier, Université de Bourgogne et Xavier Pons, Université Paris-Est Créteil.

Indigenous Methodologies, Research and Practices for Sustainable Development Marcellus F. Mbah, Walter Leal Filho, Sandra Ajaps, 2022-10-21. This book states that whilst academic research has long been grounded on the idea of western or scientific epistemologies, this often does not capture the uniqueness of Indigenous contexts and particularly as it relates to the achievement of the United Nations Sustainable Development Goals (SDGs). The SDGs were announced in 2015, accompanied by 17 goals and 169 targets. These goals are the means through which Agenda 2030 for sustainable development is to be pursued and realised over the next 15 years, and the contributions of Indigenous peoples are essential to achieving these goals. Indigenous peoples can be found in practically every region of the world, living on ancestral homelands in major cities, rainforests, mountain regions, desert plains, the Arctic and small Pacific Islands. Their languages, knowledges and values are rooted in the landscapes and natural resources within their territories. However, many Indigenous peoples are now minorities within their homelands and globally, and there is a dearth of research based on Indigenous epistemologies and methodologies. Furthermore, academic research on Indigenous peoples is typically based on western lenses. Thus, the paucity of Indigenous methodologies within mainstream research discourses presents challenges for implementing practical research designs and interpretations that can address epistemological distinctiveness within Indigenous communities. There is therefore the need to articulate as well as bring to the nexus of research aimed at fostering sustainable development a decolonising perspective in research design and practice. This is what this book wants to achieve. The contributions critically reflect on Indigenous approaches to research design and implementation towards achieving the sustainable development goals, as well as the associated challenges and opportunities. The contributions also advanced knowledge theory and practice of Indigenous methodologies for sustainable development.

Waging War and Making Peace Matthew D'Auria, Rolf Petri, Jan Vermeiren, 2024-12-02. The history of Europe is marked not only by violence and division but also by efforts to reduce the destructiveness of war. In this volume, the authors explore the meaning of Europe within war and peace discourses from the eighteenth to the twentieth centuries. They examine imagined wars, the post-1815 security order, the portrayal of Russian and Muslim Others, double standards in international law, pacifist rhetoric and the role of Europe in war propaganda and resistance movements. The authors demonstrate how both war and peace practices have shaped the concept of Europe over time.

Political Parties in the Digital Age Guy Lachapelle, Philippe Maarek, 2015-07-01 The Internet and social media may initially have been understood as just one more instrument politicians could employ to manage without political parties However these media cannot be reduced to being a tool available solely to politicians The electronic media make reinforcement of the glocalization of the public and political sphere a process already set in motion with the advent of television and they can develop the trend even further Political parties are therefore once again becoming indispensable they are in an unparalleled position to recreate social and political bonds for only they stand

both at the center and on the periphery of the new sphere encompassing public and political life

Manuel des Droits de l'Homme à l'Eau Potable et à l'Assainissement à l'intention des Praticiens Robert Bos, 2018-09-15

Le Manuel des Droits de l'Homme et l'Eau Potable et l'Assainissement à l'intention des Praticiens vise introduire les principes et concepts contenus dans les résolutions des Nations Unies reconnaissant le Droit de l'Homme à l'Eau Potable et l'Assainissement DHEA.

Clarifier le langage et la terminologie utilisés dans la promotion des droits de l'homme et fournir des conseils sur les rôles et les responsabilités de tous ceux qui contribuent à la réalisation progressive des DHEA et sur la façon dont les principes et les actions en matière de droits humains peuvent être incorporés dans leurs fonctions essentielles.

Le Manuel met en lumière les principes et critères relatifs aux droits de l'homme dans le domaine de l'eau potable et de l'assainissement. Il explique les obligations juridiques internationales en termes de politiques et de pratiques opérationnelles qui soutiendront la réalisation progressive de l'accès universel.

Le Manuel introduit une perspective des droits de l'homme qui ajoutera de la valeur à la prise de décision claire dans les activités quotidiennes des opérateurs des gestionnaires et des organismes de régulation. Il encourage également ses lecteurs à s'engager activement dans des dialogues nationaux pour que les droits de l'homme à l'eau potable et à l'assainissement soient traduits en politiques, lois et règlements nationaux et locaux.

La création d'un tel environnement favorable n'est en fait que la première étape du processus de réalisation progressive. La répartition des rôles et des responsabilités est l'étape suivante dans un cadre institutionnel et opérationnel actualisé qui permet d'appliquer une perspective des droits de l'homme au processus d'examen et de révision des fonctions essentielles des opérateurs des prestataires de services et des organismes de régulation.
