1. Bible Translations

The OT was written in Hebrew, the NT in Greek.

Autographs: the original documents of Scripture

Textual criticism: the technical discipline that compares the various copies of a biblical text in an effort to determine what was most likely the original text.

Style translation: involves moving the meaning of a text in one language (source language) to another language (receptor language).

English Bibles prior to 1611: Wycliffe Bible, William Tyndale's NT, Coverdale Bible, Great Bible, Geneva Bible, Bishops' Bible.

Authorized Version of 1611 (KJV) was revised several times up until 1769. The 1769 revision is the one still being printed today. Readers today have two main problems with

the KJV: (1) the translators used an inferior Greek text constructed from a few late manuscripts, and (2) many of its words and phrases have become archaic or obsolete.

Approaches to Bible translation. The more formal approach tries to stay as close as possible to the structure and words of the original text. The more functional approach tries to express the meaning of the original text in today's language using equivalent words and structures. See Translation Spectrum.

2. The Interpretive Journey

The interpretive steps:

Step 3: Grasp the text in their town.
What did the text mean to the original audience?

Step 2: Measure the width of the river to cross. What are the differences between the biblical audience and us?

Step 3: Cross the principalizing bridge.
What is the theological principle in this text?

Step 4: Consult the official map. How does our theological principle fit with the rest of the Bible?

Step 5: Grasp the text in our totem. How should individual Christians today live out the theological principles?

Criteria for Principles

- The principle should be reflected in the text.
- The principle should be timeless and not tied to a specific situation.
- The principle should not be culturally bound.
