Inspirations for Today Dorothea Erdmuth Lotze-Kola, 2018-09-27 Life can be overwhelming Life can even leave us raw and broken both spiritually and physically And as Christians we may often wonder how God is present in our personal and global world Yet God is there for us even in these moments of brokenness and struggle In Inspirations for Today author Dorothea Erdmuth Lotze Kola responds to the pressures of the world with a heartfelt daily devotional that you can use to find inspiration in prayer and meditation Offering biblical verses and quotes of wisdom from noted authors poets activists and world dignitaries Dorothea engages in a daily dialogue where she shares her perspective on faith and life as a marriage and family therapist as a pastor and as a wife and a mother with teenaged girls It can be hard for Christians to engage with today s world especially when they feel doubt about God s presence in their lives But with daily reflection on God s Word and time set aside for spiritual meditation you too can be reminded each and every day that God is with you and that he is working in the world as the Holy Spirit

Occupy the Solution Not Wall Street Hema Senanayake, 2012-09-10 The development of physical productive forces is not cyclical but we have a macroeconomic system that follows boom and bust cycles If the development of physical productive power behaves in a boom and bust cyclical pattern we have to tolerate the boom and bust cycle of macroeconomic output and the system as a whole But if the progress of the physical productive power or the potential of the increment of physical productive power is progressive it is not necessary to tolerate the cyclical behavior of the macroeconomic system This does not mean that the business cycles of microeconomic system which correspond to the performance of individual enterprises should not be tolerated instead such cyclical behavior is necessary to ensure business efficiency that is based on consumer preferences Businesses should be allowed to fail and new businesses should be allowed to emerge based on efficiency and consumer preferences But macroeconomic system failures are not due to consumer preferences but to the general illiquidity of consumers arising from a cyclical bad debt crisis as explained by the System Gap Theory The illiquidity of consumers is not a physical phenomenon but a monetary phenomenon and money that is not real is an abstract quantity which we can control That is why I strongly argue that we could have prevented the collapse of macroeconomic systems in the US and Europe in late 2007 and the continuing crisis can be resolved rather quickly if we change the monetary equation To do it what was and is needed is a new macroeconomic policy tool and wisdom beyond the Federal Reserve
