Public Debt and the Common Good James Odom, 2018-07-18 The American national debt stands at 20.49 trillion as of January 2018 or roughly 63,000 for every person in the United States The national debt has grown six fold in the past 25 years and borrowing only has accelerated in recent administrations What are the factors driving such unrestrained borrowing Is American fiscal policy different now than in an earlier era Is there a moral dimension to public debt and if so how can that dimension be measured Public Debt and the

Common Good addresses these and other questions by looking to the fiscal policy of the American states Drawing on classical themes and the longest quantitative review of state debt in the literature James Odom expertly integrates institutional analysis with dimensions of culture to define the parameters of political freedom in a theoretically coherent way In doing so Odom argues that centralization and injustice or the incapacity for the common good can help explain state indebtedness Contributing to ongoing scholarly debates on public debt theory this book will be of interest to students scholars and practitioners who work at the intersection of political philosophy and economics as well as those who specialize in state public policy state politics and federalism more generally *Modern Religion, Modern Race* Theodore Vial, 2016-06-16

Religion is a racialized category even when race is not explicitly mentioned In *Modern Religion, Modern Race* Theodore Vial argues that because the categories of religion and race are rooted in the post Enlightenment project of reimagining what it means to be human we cannot simply will ourselves to stop using them Only by acknowledging that religion is already racialized can we begin to understand how the two concepts are intertwined and how they operate in our modern world It has become common to argue that the category religion is not universal or even very old but is a product of Europe s Enlightenment modernization Equally common is the argument that religion is not an innocent category of analysis but is implicated in colonial regimes of control and as such plays a role in Europe s process of identity construction of itself and of non European others Current debates about race follow an eerily similar trajectory race is not an ancient but a modern construction It is part of the project of colonialism and race discourse forms one of the cornerstones of modern European identity making Why can t we stop using them or re construct them in less toxic ways By examining the theories of Kant Herder and Schleiermacher among others Vial uncovers co constitutive nature of race and religion describes how they became building blocks of the modern world and shows how the two concepts continue to be used today to form identity and to make sense of the world He shows that while we disdain the racist language of some of the founders of religious studies the continued influence of the modern worldview they helped create leads us often unwittingly to reiterate many of the same distinctions and hierarchies Although it may not be time to abandon the very category of religion with all its attendant baggage *Modern Religion, Modern Race* calls for us to examine that baggage critically and to be fully conscious of the ways in which religion always carries with it dangerous ideas of race *Is the Market a Test of Truth and Beauty?: Essays in Political Economy* Leland B. Yeager, 2011 *Mapping the Edges and the In-between* Nancy Nyquist Potter, 2009-06-25

Borderline Personality Disorder BPD is a diagnosis given to ten percent of all those seen in outpatient mental health facilities and twenty percent of those seen in inpatient psychiatric units This is a significant number of people in the Western world Yet many of the core concepts and symptoms that underlie this diagnosis are questionable Many of the attitudes and actions of carers are based on assumptions about those with BPD that cry out for analysis with both cultural and gender norms interacting with clinical diagnosis and treatment to the detriment of both carers and patients This book considers how we

diagnose BPD looking at the key constructs identity disturbance inappropriate or excessive anger unstable relationships impulsivity self injurious behaviour and manipulativity It starts by looking at the cultural and gender assumptions and norms behind BPD drawing upon philosophical clinical anthropological and sociological literature Combining philosophical analysis with clinical experience and patients writings it clarifies the constructs so that the reader can understand the messiness and complexity that frames this diagnosis and treatment After examining the current state of these constructs and their effects on carer patient interactions Part II sees an application of virtue theory to therapeutic treatment with BPD patients It looks at three virtues that are particularly important for clinicians and other carers to cultivate when working with BPD patients trustworthiness the virtue of giving uptake and empathy It argues that in their absence not only are clinicians attitudes harmful to patients but that the status of the diagnosis is actually compromised Mapping the Edges and the In Between presents a compelling argument that Borderline Personality Disorder needs to be approached in a new light one that will benefit patients
