Claiming Space Cheryl Teelucksingh, 2006-05-29 *Claiming Space* Racialization in Canadian Cities critically examines the various ways in which Canadian cities continue to be racialized despite objective evidence of racial diversity and the dominant ideology of multiculturalism. Contributors consider how spatial conditions in Canadian cities are simultaneously part of and influenced by racial domination and racial resistance. Reflecting on the ways in which race is systematically hidden within the workings of Canadian cities, the book also explores the ways in which racialized people attempt to claim space. These essays cover a diverse range of Canadian urban spaces and various racial groups as well as the intersection of ethnicity, class, gender, and sexuality. Linking themes include issues related to subjectivity and space, the importance of new space that arises by challenging the dominant ideology of multiculturalism and the relationship between diasporic identities and claims to space.

Greek Realities Finley Hooper, 1978 The questions they raised and the answers they offered are still the concern of us all. Finley Hooper **Egypt, Greece, and Rome** Corinna Rossi, 2022-05-04 Historical events literally took place in specific contexts where things are shapes how things are. In this book Corinna Rossi examines how three different ways of interacting with the surrounding world were shaped by their physical context in ancient Egypt, Greece and Rome. Following a discussion on the relationship between history and geography, Rossi delves into the geographical settings of these three civilisations, analysing human mobility within them and how cultural development was shaped by these movements. Rossi also identifies three possible models to describe the three different approaches specific to each of these ancient societies.

Egypt, Greece and Rome: A History of Space and Places is suitable for students and scholars with previous understanding of these three civilisations and an interest in the relationship between history and geography.

The Antikythera Mechanism Evangelos G. Vassianatos, 2021-10-01 In *Antikythera Mechanism: The Story Behind the Genius of the Greek Computer and Its Demise* Evangelos Vassianatos, historian and ecopolitical theorist shows that after the conquest of Persia by Alexander the Great in the late fourth century BCE, the Greeks especially in Egypt reached unprecedented heights of achievements in science, technology and civilization. The Antikythera Mechanism, an astronomical computer probably crafted in Rhodes in the second century BCE, was proof of that prowess. It's the grandfather of our computers. Greek sponge divers discovered the Antikythera Mechanism in 1900 on a 2,100 year old Roman era shipwreck. The hand-powered device reveals a sophisticated Greek technology previously unknown to scholars and historians, not seen and understood again until the twentieth and twenty-first centuries. The book not only describes how the sophisticated political and technological infrastructure of the Greeks after Alexander the Great resulted in the Antikythera celestial computer and the bedrock of science and technology we know today, but also how the influence of Christianity on Greek civilization destroyed the nascent computer age of ancient Greece. Vassianatos, born in Greece and educated in America, is a historian, author and journalist. He is a passionate champion of Greek culture and a well-suited guide to this historical account. Vassianatos explains how and why

Greek scientists employed advanced engineering in translating the beautiful conception of the Antikythera Mechanism into an astronomical computer of genius a bronze geared device of mathematical astronomy predicting the eclipses of the Sun and the Moon calculating the risings and settings of important stars and constellations and the movements of the planets around the Sun while mechanizing the predictions of scientific theories The computer's accurate calendar connected these cosmic phenomena to the Olympics and other major Panhellenic religious and athletic celebrations bringing the Greeks closer to their gods traditions and the Cosmos **Library of Congress Subject Headings** Library of Congress,2007
