Finding the Synoptic Gospels' Construction Process Hojoon Ahn, 2024-06-11 This study critically examines the current state of Synoptic Gospel studies particularly many scholars reliance on the Literary Dependence Hypothesis and endeavors to advance a more balanced approach The author attempts to deduce the Synoptic Gospels construction process by meticulously examining the Eucharist and its co text within these Gospels by employing a model of Mode Register Analysis based on Systemic Functional Linguistics This study uncovers the probability that each designated text in the Synoptic Gospels was constructed based on oral Gospel tradition s under the influence of each constructor s identity

The Negative Existential Cycle Ljuba Veselinova, Arja Hamari, 2022-12-20 In 1991 William Croft suggested that negative existentials typically lexical expressions that mean not exist not have are one possible source for negation markers and gave his hypothesis the name Negative Existential Cycle NEC It is a variationist model based on cross linguistic data For a good twenty years following its formulation it was cited at face value without ever having been tested by historical comparative data Over the last decade Ljuba Veselinova has worked on testing the model in a comparative perspective and this edited volume further expands on her work The collection presented here features detailed studies of several language families such as Bantu Chadic and Indo European A number of articles focus on the micro variation and attested historical developments within smaller groups and clusters such as Arabic Mandarin and Cantonese and Nanaic Finally variation and historical developments in specific languages are discussed for Ancient Hebrew Ancient Egyptian Moksha Mordvin Uralic Bashkir Turkic Kalmyk Mongolic three Pama Nyungan languages O dam Southern Uto Aztecan and Tacana Takanan Amazonian Bolivia The book is concluded by two chapters devoted to modeling cyclical processes in language change from different theoretical perspectives Key notions discussed throughout the book include affirmative and negative existential constructions the expansion of the latter into verbal negation and subsequently from more specific to more general markers of negation Nominalizations as well as the uses of negative existentials as standalone negative answers figure among the most frequent pathways whereby negative existentials evolve as general negation markers The operation of the Negative Existential Cycle appears partly genealogically conditioned as the cycle is found to iterate regularly within some families but never starts in others as is the case in Bantu In addition other special negation markers such as nominal negators are found to undergo similar processes i e they expand into the verbal domain and thereby develop into more general negation markers The book

provides rich information on a specific path of the evolution of negation on cyclical processes in language change and it shows cases the historical comparative method in a modern setting

Morphological and Syntactical Irregularities in the Book of Revelation Laurențiu Moț, 2015-03-31 Morphological and Syntactical Irregularities in the Book of Revelation by Laurențiu Florentin Moț is an approach to the solecisms of Johannine Apocalypse from a Greek perspective. The work aims at demonstrating that in accord with Second Language Acquisition studies Semitic transfer in Revelation is extremely rare. Most of its linguistic peculiarities can be explained within the context of the Greek language. Morphological and Syntactical Irregularities in the Book of Revelation is unique in several ways. First it deals with the most comprehensive list of solecisms. Second it treats grammatical irregularities in their own right looking at their cause, explanation and contribution to the interpretation of the text. Third it is interdisciplinary bringing together textual criticism, Greek linguistics and NT exegesis.

Current Trends in Greek Linguistics Georgia Fragaki, Thanasis Georgakopoulos, Charalambos Themistocleous, 2012-11-15 Current Trends in Greek Linguistics is a collection of fifteen papers written by junior researchers of Greek linguistics aiming to highlight the ongoing linguistic research on Greek. The collected papers present original research from a fresh perspective and bring to the fore aspects of the Greek language that have not been extensively examined so far. The authors provide a concise overview of their field and address problems in a variety of theoretical frameworks including cognitive linguistics, formal linguistics, corpus linguistics, variational sociolinguistics and critical discourse analysis. The volume comprises four sections: Aspects of Meaning, Textual and Sociolinguistic Approaches, Phonetics and Phonology, and Clinical Linguistics and Language Teaching. The first section includes chapters exploring lexical temporal expressions, the conceptualisation of time and the semantic properties of the subjunctive mood. The second section discusses issues relating to adjective evaluation, strategies of verbal humour, the role of social variables, media and political discourse. The section on phonetics and phonology includes three experimental studies that explore segmental and supra segmental phenomena. The last section of the volume combines papers from two different fields dealing with aphasic speech and the teaching of idioms. This collection of papers will appeal to researchers, students of linguistics and educators who are interested in Greek and/or the implications of its study for other languages and linguistic theory.

The Linguistics of Temperature Maria Koptjevskaja-Tamm, 2015-02-11 The volume is the first comprehensive typological study of the conceptualisation of temperature in languages as reflected in their systems of central temperature terms: hot, cold, to freeze, etc. The key issues addressed here include questions such as how languages categorize the temperature domain and what other uses the temperature expressions may have, e.g. when metaphorically referring to emotions, 'warm words'. The volume contains studies of more than 50 genetically areally and typologically diverse languages and is unique in considering cross-linguistic patterns defined both by lexical and grammatical information. The detailed descriptions of the linguistic and extra-linguistic facts will serve as an important step in teasing apart the role of the different factors in how we speak about temperature: neurophysiology, cognition, environment, social

cultural practices genetic relations among languages and linguistic contact The book is a significant contribution to semantic typology and will be of interest for linguists psychologists anthropologists and philosophers

The Morphosyntax of Negative Markers Karen De Clercq, 2020-06-08 This book applies the tools of nanosyntax to the natural language phenomenon of negation Most work on negation is concerned with the study of sentence negation while low scope negation or constituent negation is hardly ever systematically discussed in the literature The present book aims to fill that gap by investigating scopally different negative markers in a sample of 23 typologically diverse languages A four way classification of negative markers is argued for and it is shown how meaningful syncretism patterns arise across those four groups of negative markers in the language sample investigated The syncretisms are meaningful in that they track the natural semantic scope of negation and provide support to the idea that morphology is not arbitrary but points to submorphemic structure Consequently this study leads to a decomposition of the negative morpheme into five privative features Tense Focus Classification Quantity and Negation proper Finally the book argues that sentence constituent and lexical negation can all be treated in the same module of the grammar i e syntax

Balkan Syntax and (Universal) Principles of Grammar Iliyana Krapova, Brian Joseph, 2018-11-19 This book investigates morpho syntactic convergences that characterize the languages of the Balkan Sprachbund Balkan Slavic Greek Romanian Albanian Balkan Romani Apart from new data the volume features contributions within different theoretical frameworks contact linguistics functional linguistics typology areal linguistics and generative grammar

Maltese Przemyslaw Turek, Julia Nintemann, 2022-04-04 This volume features nine articles covering various aspects of Maltese linguistics Part I mostly dedicated to the Maltese lexicon opens with Bednarowicz's comparison of Maltese and Arabic adjectives Fabri then categorizes various types of constructions involving the preposition *ta* of The paper by Lucas and Spagnol discusses Maltese words containing an innovative final *n* Part II deals with the syntax of Maltese Azzopardi's paper focuses on a construction in Maltese which consists of a sequence of two or more finite verbs Just and pl present the first corpus based study of differential object indexing in Maltese In Part III on morphosyntax Turek analyzes Arabic prepositions in Classical Modern Standard Arabic and Arabic dialects and contrasts them with their Maltese equivalents Stolz and Vorholt then analyze the structural and functional similarities and differences of spatial interrogatives in Maltese and Spanish Vorholt then investigates the adpositions of sixteen European languages including Maltese and examines the relationship between length and frequency The volume is closed with Part IV on phonology and Avram's paper in which the diachrony of voicing assimilation in consonant clusters is reconstructed

Syntax and Its Limits Raffaella Folli, Christina Sevdali, Robert Truswell, 2013-12 In this book leading linguists explore the empirical scope of syntactic theory by concentrating on a set of phenomena for which both syntactic and nonsyntactic analyses appear plausible The volume is organized into four thematic sections architectures syntax and information structure syntax and the lexicon and lexical items at the interfaces

Here - Hither - Hence and Related Categories Julia Nintemann, Maja Robbers, Nicole

Hober,2020-07-20 As a follow up study to the global comparison of spatial interrogatives *Studia Typologica* 20 the present book examines the spatial declarative counterparts which are provided by the expression class of spatial deictic adverbs In a functionally motivated typological approach equivalents of Early Modern English here hither hence and there thither thence are identified across a sample of 250 languages from all macro areas These are also quantitatively assessed to extrapolate areal and global trends of coding patterns The formal relationships between spatial interrogative and spatial declarative paradigms are analyzed with a focus on the syncretism of categories and of individual cells Qualitative discussions of patterns precede in depth treatments of problematic cases and other relevant issues related to the research topic The quantitative results strongly point to areal linguistic trends concerning the distribution of distinct and non distinct coding of the three spatial relations Place Goal and Source Additional aspects such as quantitative evaluations of constructional complexity are addressed subsequently

broad cross linguistic perspective and a detailed semantic analysis largely based on new and comparable data collected by means of questionnaires all accessible in the appendix of the book It represents the first systematic attempt towards a unified typology of coordination relations
