Winning Space Brandon J. Weichert, 2020-09-15 When President Donald J Trump announced the creation of America s sixth branch of the military the United States Space Force many in Washington scoffed But U S rivals in China Russia Iran and North Korea

took notice Since the end of the Cold War these American foes have chafed under the full spectrum dominance that the American superpower has enjoyed globally They have identified space as a key strategic domain where they can challenge and possibly defeat the United States military And depriving the U S military and or its economy of access to space during an international crisis could spell doom for the United States in other strategic domains land sea air and cyberspace After all space is critical for America s vaunted information dominance Satellites overhead are the backbone of America s global military Remove them from orbit and U S forces worldwide are rendered deaf dumb and blind What s more space is a more than 1 trillion economy just waiting to be developed Whichever country gets there first will have considerable economic and geopolitical power on Earth Despite President Trump s creation of the Space Force Swamp Dwellers in Washington continue resisting his reforms to U S space and technology policy Winning Space tracks the increasing competition the United States is facing in the technology sector and depicts how the United States has been engaged in a Second Space Race and how it has been losing Author Brandon Weichert warns how the United States is at risk for a Pearl Harbor type event in space Weichert advocates for the full embrace of Trump s reforms for America s flailing space policy while also calling for a minimum 1 trillion investment in advanced research and development here in the United States to stay ahead of America s advancing foes Contrary to what many Americans may think the United States has been declining in space and the high technology development sector Should it lose its dominance in these areas it will surely lose its superpower status The next decade presents U S policymakers one last chance to preserve the superpower status that America fought two world wars and the Cold War to build Time is not on our side We are on notice but we have not noticed
