

MacGREGOR 25

The MacGregor 25 is one of the fastest boats of its class, the long flat underbody giving high speed surfing and planing, and the deep, efficient keel provides stability and lift for excellent performance sailing into the wind. Easy with its simplified construction, it is easy to sail, it is large enough to be stable and comfortable, yet small and light enough to be easily handled by one person. It is possible to leave it tied up in a MacGregor 25 in a simple afternoon, and it is also ideal for a family. The MacGregor 25 features a 60% pre-rigged masting system, which is the most thoroughly tested and proven method of combining self-righting stability and high performance with the shallow draft needed for easy launching and safe trailering. A mast which articulates swings the mast back and up to permit easy launching and beaching. The cockpit is 8' 7" long, and extends to 8' inside the cabin. There is ample storage for all the gear you will require for comfortable cruising.

RAISED THE MAST: (1) Slide the mast to the rear and pin the bottom of the mast to the longest mast step. (2) & (3) Raise the mast. It is light, and not too hard to lift. The mast can be rotated to vary trim if a second person stands on the foredeck and pulls.

LAUNCHED: Back the trailer in until the boat starts to float free. Tie a line to the bow and give the boat a gentle shove. When the boat clears the trailer, pull it back to the ramp to stop, say this cry. Then as the process is repeat the boat to the trailer.

Cruising World ,1984-01 **The Behaviour and Design of Steel Structures to EC3, Fourth Edition** N.S. Trahair,M.A. Bradford,David Nethercot,Leroy Gardner,2007-11-21 The fully revised fourth edition of this successful textbook fills a void which will arise when British designers start using the European steel code EC3 instead of the current steel code BS5950 The principal feature of the forth edition is the discussion of the behaviour of steel structures and the criteria used in design according to the British version of EC3 Thus it serves to bridge the gap which too often occurs when attention is concentrated on methods of analysis and the sizing of structural components Because emphasis is placed on the development of an understanding of behaviour many analytical details are either omitted in favour of more descriptive explanations or are relegated to appendices The many worked examples both illustrate the behaviour of steel structures and exemplify details of the design process The Behaviour and Design of Steel Structures to EC3 is a key text for senior undergraduate and graduate students and an essential reference tool for practising structural engineers in the UK and other countries
