The Politics of Systematization in EU Product Safety Regulation: Market, State, Collectivity, and Integration Kai Purnhagen,2013-06-26 This book examines the increasing role of the legal method of systematisation in European Union EU law It argues that the legal method of systematisation that has been developed in a welfare state context is increasingly used as a regulative tool to functionally integrate the market The book uses the example of EU product regulation as a reference to illustrate the impact of systematisation on EU law It draws conclusions from this phenomenon and redefines the current place and origin of systematisation in the EU legal system It puts forward and demonstrates two main arguments First in certain sectors such as in EU product safety law the quality of EU law changes from a sector specific and reactive field of law to an increasingly coherent legal system at European level Therefore instead of punctual market intervention it increasingly governs whole market areas By doing so it challenges and often fully replaces the respective welfare based legal systems in the Member States for the benefit of the ideal of a market driven EU legal system Second at European level the ideal is in development This illustrates the change of the function of Statecraft from nation states to market states
