

The background of the cover is a long-exposure photograph of a waterfall. The water is blurred into soft, white and blue streaks, creating a sense of motion. In the foreground, a dark, mossy rock sits in the shallow water, with several bright red flowers (possibly Japanese anemones) growing from it. The overall color palette is dominated by the blues and whites of the water, with the green of the moss and the red of the flowers providing contrast.

The Publishers' Trade List Annual, 1991 [The British National Bibliography](#) Arthur James Wells, 2002

Suited Themselves Sharon Beder, 2012 In this brilliantly researched expos communications Rottweiler Sharon Beder blasts open the backrooms and boardrooms to reveal how the international corporate elite dictate global politics for their own benefit Beder shows how they created business associations and think tanks in the 1970s to drive public policy forced the worldwide privatization and deregulation of public services in the 1980s and 1990s enabling a massive transfer of ownership and control over essential services and still not satisfied have worked relentlessly since the late 1990s to rewrite the very rules of the global economy to funnel wealth and power into their pockets Want a globalized and homogenized world of conflict poverty and massive environmental degradation run by a corporate oligarchy that wipes its feet on democracy Or a democratic world where poverty is history companies work for people and clean water is a right not a privilege you pay for Beder's message is clear it's your world and it's time to fight for it

The Assumptions Economists Make Jonathan Schlefer, 2012-03-20 Economists make confident assertions in op ed columns and on cable news so why are their explanations at odds with equally confident assertions from other economists And why are all economic predictions so rarely borne out Harnessing his frustration with this contradiction Schlefer set out to investigate how economists arrive at their opinions

[Politics and Markets in the Wake of the Asian Crisis](#) Mark Beeson, Kanishka

Jayasuriya, Hyuk-Rae Kim, Richard Robison, 2003-09-02 This book is a challenging volume by distinguished leading scholars of East Asian political economy it provides a distinct alternative to simplistic accounts of the Asian crisis which generally swing between an emphasis on convergence imposed by global economic forces and the resurrection of the special patterns of East Asian economic governance The authors argue that global forces and domestic structures are engendering new forms of economic and political regulation in East Asia While these signal the death knell of the developmental state this in itself does not presuppose a convergence towards a standard model of global capitalism The arguments in this book will contribute significantly to the construction of a new research agenda for comparative political economy at the dawn of a new century Politics and Markets in the Wake of the Asian Crisis covers a range of East Asian countries including the People's Republic of China South Korea Indonesia Thailand and Malaysia All the studies are linked together by a common endeavour to explore the dynamic interaction between global economic forces and domestic structures The book is at the cutting edge of the study of East Asian political economy and is distinguished by the attention it pays to the regional and international context of the crisis It also contains theoretically sophisticated analyses of organisations such as APEC and the IMF

Remittances Samuel Munzele Maimbo, Dilip Ratha, 2005 Migrants have long faced unwarranted constraints to sending money to family members and relatives in their home countries among them costly fees and commissions inconvenient formal banking hours and inefficient domestic banking services that delay final payment to the beneficiaries Yet such remittances are perhaps the largest source of external finance in developing countries Officially recorded remittance flows to developing countries exceeded US 125 billion in 2004 making them the second largest source of development finance after foreign direct investment This book demonstrates that governments in developing countries increasingly recognize the importance of remittance flows and are quickly addressing these constraints

Books in Print Supplement, 2002 Shadow Networks Francisco Louçã, Michael Ash, 2018-10-03 The 2007-08 financial crisis surprised many economists and the public But how did the crisis come about why was it so deep and why has the clean up been so slow and painful Many accounts of the crisis focus on renegade activity in marginal financial sectors Shadow Networks challenges this pervading view and sets out to demonstrate that far from a dissident branch the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance The collapse was not an accident but baked into the system of finance from the start Shadow Networks traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade long crisis took shape Shadow Networks Financial Disorder and the System that Caused Crisis is a probing examination of the roles of the powerful elite It traces the networks and institutions that support a finance focused market centered model of economy and society from their ascendancy to their

surprising resilience in the face of manifest failures *The Neoliberal Age?* Aled Davies, Ben Jackson, Florence Sutcliffe-Braithwaite, 2021-12-07 The late twentieth and early twenty first centuries are commonly characterised as an age of neoliberalism in which individualism competition free markets and privatisation came to dominate Britain's politics economy and society This historical framing has proven highly controversial within both academia and contemporary political and public debate Standard accounts of neoliberalism generally focus on the influence of political ideas in reshaping British politics according to this narrative neoliberalism was a right wing ideology peddled by political economists think tanks and politicians from the 1930s onwards which finally triumphed in the 1970s and 1980s *The Neoliberal Age* suggests this narrative is too simplistic Where the standard story sees neoliberalism as right wing this book points to some left wing origins too where the standard story emphasises the agency of think tanks and politicians this book shows that other actors from the business world were also highly significant Where the standard story can suggest that neoliberalism transformed subjectivities and social lives this book illuminates other forces which helped make Britain more individualistic in the late twentieth century The analysis thus takes neoliberalism seriously but also shows that it cannot be the only explanatory framework for understanding contemporary Britain The book showcases cutting edge research making it useful to researchers and students as well as to those interested in understanding the forces that have shaped our recent past
