Combating Inequality Alexander Gallas, Hansjörg Herr, Frank Hoffer, Christoph Scherrer, 2015-12-22 Economic inequality has recently gained considerable academic attention. However, two important aspects of inequality have not been discussed systematically: its multidimensional nature and the question of what can be done to reverse it. This book offers insights from scholars representing the Global Labour University, which operates in Brazil, Germany, India, South Africa, and the US. They analyse the various drivers of inequality, assess policy responses, and discuss counterstrategies. The main findings of this book are that rising levels of inequality cannot be addressed only with the standard policies, responses, namely education, redistribution, and green growth. In addition, the way markets currently function needs to be corrected. The chapters in this volume focus on specific fields of contemporary capitalism where important drivers of inequality are located, for example, the labour market, the financial system, the tax system, multi-national corporations, and gender relations. Other chapters discuss in detail where political opportunities for change lie. They critically assess existing countermeasures, the idea of a green economy, and its implications for inequality, and existing campaigns by trade unions and new social movements against inequality. In line with the global nature of the problem, this book contains case studies on countries both from the north and south with considerable economic and political weight. This book provides academics, political practitioners, and civil society activists with a range of ideas on how to drive back inequality. It will be of interest to those who study political economy, development economy, and labour economics.

The Macroeconomics of Finance-dominated Capitalism and Its Crisis Eckhard Hein, 2012-01-01 The rise to dominance of finance in the past three decades has had many profound effects on economic performance. In this book, Eckhard Hein provides us with detailed, well-grounded, and highly insightful analyses of the macroeconomic impacts on investment, employment, global imbalances, income distribution, and much more. This is a must-read for those wanting to comprehend the macroeconomics of the era of financialization and for those seeking macroeconomic policies to address the financial crisis and bring economic prosperity. Malcolm Sawyer, University of Leeds, UK. Eckhard Hein examines the causes and consequences of financialisation. His book is economics as it should always be: it combines reflections, data, gathering empirical analysis, theoretical formalization, and policy recommendations. Hein goes beyond the exuberant behaviour of the banking industry to analyse the global financial crisis and the eurozone crisis, showing through various variants of a Kaleckian growth model the macroeconomic consequences of the rising dominance of finance over modern capitalism during the last three decades. Marc Lavoie, University of Ottawa, Canada. In this timely and thought-provoking book, Eckhard Hein illustrates that the Great Recession, which hit the world economy in 2008-09, is rooted in the contradictions of finance-dominated capitalism. The author provides an in-depth exploration of the macroeconomics of finance-dominated capitalism, its problems, and its crisis, and presents economic policy lessons and alternatives. In particular, he shows

that since the early 1980s finance dominated capitalism has affected long run economic developments via three distinct channels the re distribution of income at the expense of low labour incomes the dampening of investment in real capital stock and an increasing potential for wealth based and debt financed consumption the author concludes that against the background of these basic macroeconomic tendencies increasing instability potentials at the national economy levels and rising current account imbalances at both global and European levels have developed and have contributed to the severity of the Great Recession This systematic study of finance dominated capitalism presented from a macroeconomic perspective will prove a thought provoking read for academics researchers graduate students and economic policy consultants with an interest in macroeconomics financial economics economic policies and distribution and growth [Handbook of Active Ageing and Quality of Life](#) Fermina Rojo-Pérez, Gloria Fernández-Mayoralas, 2021-04-12 This handbook presents an overview of studies on the relationship of active ageing and quality of life It addresses the new challenges of ageing from the paradigm of positive ageing active healthy and successful for a better quality of life It provides theoretical perspectives and empirical studies including scientific knowledge as well as practical experiences about the good ageing and the quality of later life around the world in order to respond to the challenges of an aged population The handbook is structured in 4 sections covering theoretical and conceptual perspectives social policy issues and research agenda methods measurement instrument scales and evaluations and lastly application studies including domains and geographical contexts Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com/div](#) **Kalecki and Kaleckian Economics** Louis-Philippe Rochon, Marcin Czachor, Gracjan Robert Bachurewicz, 2021-11-29 This book helps in pushing forward a Kaleckian research agenda that is even more urgent given the 2007-2009 financial crisis and the current post COVID recovery Micha Kalecki was a leading heterodox economist whose influence in the field perhaps even surpasses that of Keynes Kalecki's insights are even more relevant today and scholars are encouraged to apply his conclusions to ensure the sustainability of our economic systems This edited volume honouring the work of Micha Kalecki includes chapters contributed by celebrated Kaleckian economists In honour of the 50th anniversary of his demise the Review of Political Economy ROPE and Edward Lipiński Foundation hosted a conference in September 2020 to celebrate his contribution to heterodox economics and his lasting legacy These chapters honouring the work of Micha Kalecki span a panoply of topics and include a personal note from one of his former students and friend and cover topics such as Kalecki's relationship with the Cantabrigians labour economics fiscal policy income distribution gender finance debt and democracy The chapters in this book were originally published as a special issue of the journal Review of Political Economy [Handbook of Media and Communication Economics](#) Jan Krone, Tassilo Pellegrini, 2024-10-28 This handbook maps the media economy in its entirety against the background of the advancing digitalization of communication media production media distribution and the adaptation of regulatory framework conditions from different disciplinary approaches It provides an integrated view on

digitally induced economic transformations of the European media sector and gives an explicitly European perspective on media economics challenging the dominant US American view Topics covered include but are not limited to Theoretical approaches to media economics media technologies and data management in media economics building blocks of the media industry media types and core distribution markets system aspects and communication culture media systems and regulatory policy as well as methods of media economics The handbook is a must read for students teachers and researchers in media and communication economics and science as well as practitioners and policy makers at the nexus of media business and politics
