Luminol Theory Laura E. Joyce,2017-08-23 Representations of forensic procedures saturate popular culture in both fiction and true crime One of the most striking forensic tools used in these narratives is the chemical luminol so named because it glows an eerie greenish blue when it comes into contact with the tiniest drops of human blood Luminol is a deeply ambivalent object it is both a tool of the police historically abused and misappropriated and yet it offers hope to families of victims by allowing hidden crimes to surface Forensic enquiry can exonerate those falsely accused of crimes and yet the rise of forensic science is synonymous with the development of the deeply racist science of eugenics Luminol Theory investigates the possibility of using a tool of the state in subversive or radical ways By introducing luminol as an agent of forensic inquiry Luminol Theory approaches the exploratory stages that a crime scene investigation might take exploring experimental literature as though these texts were crime scenes in order to discover what this deeply strange object can tell us about crime death and history to make visible violent crimes and to offer a tangible encounter with death and finitude At the luminol drenched crime scene

flashes of illumination throw up words sentences and fragments that offer luminous strange glimpses bobbing up from below their polished surfaces When luminol shines its light it reveals it is magical it is prescient and it has a nasty allure
