Fundamentals of Medicinal Chemistry and Drug Metabolism M. O. Faruk Khan, Ashok Philip, 2018-06-01

The primary objective of this 4 volume book series is to educate PharmD students on the subject of medicinal chemistry

The book set serves as a reference guide to pharmacists on aspects of chemical basis of drug action

This first volume of the series is comprised of 8 chapters focusing on basic background information about medicinal chemistry

It takes a succinct and conceptual approach to introducing important fundamental concepts required for a clear understanding of various facets of pharmacotherapeutic agents drug metabolism and important biosynthetic pathways that are relevant to drug action

Notable topics covered in this first volume include the scope and importance of medicinal chemistry in pharmacy education a comprehensive discussion of the organic functional groups present in drugs

and information about four major types of biomolecules proteins carbohydrates lipids nucleic acids and key heterocyclic ring systems The concepts of acid base chemistry and salt formation and their applications to the drug action and design follow thereafter These include concepts of solubility and lipid water partition coefficient LWPC isosterism stereochemical properties mechanisms of drug action drug receptor interactions critical for pharmacological responses of drugs and much more Students and teachers will be able to integrate the knowledge presented in the book and apply medicinal chemistry concepts to understand the pharmacodynamics and pharmacokinetics of therapeutic agents in the body **Luminol Theory**

Laura E. Joyce, 2017-08-23 Representations of forensic procedures saturate popular culture in both fiction and true crime One of the most striking forensic tools used in these narratives is the chemical luminol so named because it glows an eerie greenish blue when it comes into contact with the tiniest drops of human blood Luminol is a deeply ambivalent object it is both a tool of the police historically abused and misappropriated and yet it offers hope to families of victims by allowing hidden crimes to surface Forensic enquiry can exonerate those falsely accused of crimes and yet the rise of forensic science is synonymous with the development of the deeply racist science of eugenics Luminol Theory investigates the possibility of using a tool of the state in subversive or radical ways By introducing luminol as an agent of forensic inquiry Luminol Theory approaches the exploratory stages that a crime scene investigation might take exploring experimental literature as though these texts were crime scenes in order to discover what this deeply strange object can tell us about crime death and history to make visible violent crimes and to offer a tangible encounter with death and finitude At the luminol drenched crime scene flashes of illumination throw up words sentences and fragments that offer luminous strange glimpses bobbing up from below their polished surfaces When luminol shines its light it reveals it is magical it is prescient and it has a nasty allure **TABLE OF CONTENTS** Preface Christmas Colorado 1996 Section I Queer Light Forensics Psychoanalysis Hermeneutics Section II The Abject Parlour Polyester Gothic Traces at the Scene Christmas in Colorado Section III Deadly Landscapes The Shining Colorado Histories The Locus Terribilis Conclusion Necrolight Luminol **Organic Chemistry** Thomas Vallombroso, 2007-12
