Jennifer started acting professionally in 2004 at age fourteen. But she quickly proved her major talent. For the 2008 movie The Burning Plain she earned a best new young actress award at the Venice Film Festival. And for her performance in the 2010 movie Winter's Bone Jennifer received nominations for both a Golden Globe and an Academy Award. This microblogging site has taken the Web by storm since its founding in 2007. Not much can top it when it comes to capturing its fans' imaginations except for perhaps its creator David Karp. Karp developed Tumblr after he tried to start a blog and found the process daunting. With most platforms a blogger faces a huge empty text box that begs to be filled with words. It was intimidating for a guy who'd never blogged before. Karp had the idea for tumblelogging: creating short blog posts and built Tumblr as a platform. It lets users easily post both text and images making Tumblr highly visual and expressive. Creating a different way to blog came naturally to Karp who never does things by the book. At fifteen he dropped out of school. At seventeen he moved to Tokyo, holing up with a computer and fine-tuning his tech skills. He returned to the states to build a business but to do that he stretched the truth. He used a deep voice on the phone with potential clients so they wouldn't guess how young he was. He didn't tell anyone how little experience he had. Yet people could see he had a good thing going with Tumblr. The company quickly found support and grew into what it is today: a groundbreaking site for connection and creation. And as the mastermind behind it Karp is sure to remain a figure to watch.
