**Clitic Doubling in the Balkan Languages** Dalina Kallulli, Liliane Tasmowski, 2008 This volume is a collection of articles on clitic doubling a phenomenon

that has preoccupied generative linguists since the 1980s when its theoretical importance was noted. Clitic doubling is prevalent in the Balkan languages. However, generative studies initially dealt with its properties in Romance languages with the Balkan patterns coming increasingly into focus. Since the mid-nineties, these patterns presented a variety of challenges to the generalisations reached on the basis of Romance while also raising new research questions. The volume deals among other things with the following aspects of the phenomenon: its extension within and outside the Balkan Sprachbund and the observed variation; its realizational possibilities and the constraints on the status of the doubled DP, direct or indirect object, pronominal or non pronominal; its semantics, definite specific presupposed, neither and pragmatics, topic or not, D-linked or not; its temporal and locational genesis; the relationship between the clitic and its associate. Welsh Syntax Louisa Sadler, 2016-11-10. This book first published in 1988 proposes an analysis of Welsh syntax within the theory of Government and Binding (GB). The main focus of the study is the theory of empty elements and the role of agreement phenomena in relation to empty categories. The study of the Celtic family of languages has emerged as an increasingly fruitful area of research both inside and outside GB theory. Written within the GB framework, this book provides a substantial description of some areas of Welsh syntax. Successive chapters deal with basic word order in main and embedded clauses, the null subject constructions, cliticisation and agreement, relative clauses, topicalisation and *wh* questions and passivisation. This title will be of interest to students of language and linguistics. Cracking the AP Spanish Language and Culture Exam with Audio CD, 2020 Edition.
