Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01
The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples

from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research

A Curriculum of Unquestionable Value and Lasting Relevance Lee Smith, 2022-02-16 Many of the people who are saying the schools are not providing students with the knowledge and skill levels needed for today s or tomorrow s workforce when they were in school were high achievers Many were the best and brightest their schools had to offer They also received their education during an era criticized as having not provided them with the knowledge and skills levels adequate for then or today s needs As defective products of the problem they are not capable of meeting the challenge of effecting meaningful and lasting educational curriculum change This brings up the question of what qualifies this author then to speak with authority on how to affect meaningful and lasting educational reform The answer is that he is not part of all this Many of the reformers recognize him as the guy who would punch them in the arm and take their lunch money The author was also the class clown His teachers said he was failing because he daydreamed in class They said he was failing because he did not turn in his homework They said that while he had learned to walk and talk on his own without any help from them that he had some organic problem keeping him from learning What all these teachers and counselors and evaluators and probation officers and school board members and parents and foster parents and everyone else never ever said is that he was struggling with division because he had not mastered the times tables They just did not know perhaps really did not care He knew this and in the early part of the fifth grade he decided his life would be better and easier if he submitted to learning the multiplication tables For this reason he is essentially self educated and so has a particularly different point of view from these other self described poorly prepared products of the education system In addition to being outside the public education system another factor in his qualifications to evaluate the nation s educational efforts is his shoes they are steel toed
