Zhonghua Gou, 2019-07-30 The book reveals how green buildings are currently being adapted and applied in developing countries. It includes the major developing countries such as China, Indonesia, Malaysia, Thailand, Pakistan, Cambodia, Ghana, Nigeria, and countries from the Middle East and gathers the insights of respected green building researchers from these areas to map out the developing world's green building revolution. The book highlights these countries' contribution to tackling climate change, emphasising the green building benefits and the research behind them. The contributing authors explore how the green building revolution has spread to developing countries and how national governments have initiated their own green building policies and agendas. They also explore how the market has echoed the green building policy and how a business case for green buildings has been established. In turn, they show how an international set of green building standards in the form of various techniques and tools has been incorporated into local building and construction practices. In closing, they demonstrate how the developing world is emerging as a key player for addressing the energy and environmental problems currently facing the world. The book helps developers, designers, and policy makers in governments and green building stakeholders to make better decisions on the basis of global and local conditions. It is also of interest to engineers, designers, facility managers, and researchers as it provides a holistic picture of how the industry is responding to the worldwide call for greener and more sustainable buildings.

**The Report: Qatar 2025** Oliver Cornock, Qatar is channeling its hydrocarbons wealth into long-term economic transformation with diversification accelerating after the FIFA 2022 World Cup. In 2024, non-oil sectors accounted for over 60% of GDP, led by tourism, logistics, and financial services. The energy sector also continues to be a boon for the economy as Qatar's abundant natural gas reserves and its liquefied natural gas exports aid foreign direct investment inflows.

Environmental Law in Arab States Damilola Sunday Olawuyi, Damilola Olawuyi, 2022 Environmental Law in Arab States offers a comprehensive and authoritative account of the guiding principles and rules relating to environmental protection in the Arab region. Taking an international and comparative approach, the book introduces readers to the latest developments of environmental law across the Arab region through applicable legislation, green finance, and climate technologies. The impact of these is assessed in each of the major areas of environmental regulation: air pollution, water pollution, biodiversity conservation, of nature and cultural heritage, infrastructure development, and Islamic ecology. Consideration is given to participatory and bottom-up legal strategies focusing on transparency, accountability, gender justice, and other human rights safeguards that are needed to achieve greater coherence and coordination in the implementation and enforcement of environmental regulation across the region. The book closes by providing legal assessments and reflections on how Arab countries can, through clear and comprehensive legislation, advance existing national strategies and visions on trade and investment, green growth, Islamic green finance, circular economy, blue economy, and low-carbon future, amongst others.

*Structures and Architecture* Paulo J. Cruz, 2016-10-14 Although the disciplines of architecture and structural engineering have both experienced their own historical development, their

interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process exploiting together new concepts applications and challenges This set of book of abstracts and full paper searchable CD ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference ICSA2016 organized by the School of Architecture of the University of Minho Guimar es Portugal July 2016 to promote the synergy in the collaboration between the disciplines of architecture and structural engineering

The Report: Qatar 2014 Oxford Business Group,2014-04-15 2013 saw the transition of power from the former Emir Sheikh Hamad bin Khalifa Al Thani to Sheikh Tamim bin Hamad Al Thani his fourth son and second son with Sheikha Moza bint Nasser a move unprecedented elsewhere in the Gulf but not unexpected in Qatar With sustained long term economic growth the highest per capita income in the world a stable and well capitalised banking sector a sovereign wealth fund that is of true global significance and one of the largest reserves of natural gas just offshore Qatar today has many advantages It is clear that the country is in a strong position from which to continue its robust economic performance and the years ahead will see a vast construction drive in line with the principles of Qatar National Vision 2030 and catalysed by preparations for the 2022 FIFA World Cup Oil and gas accounted for around 51.5% of Qatar s economic output in 2013 while developing downstream facilities that add value to energy by products for example has helped build a portfolio of petrochemicals chemicals and fertiliser companies and looks set to see Qatar s economic strength continue With more than 222bn of projects in the pipeline the construction sector s growth has been forecast at 15% for 2014 while spending on infrastructure is set to reach 150bn in the run up to the 2022 FIFA World Cup Against this backdrop Qatar looks set to continue offering a wide variety of opportunities for foreign investors

Applications in Sustainable Development of Smart Cities Tan Yigitcanlar, Hoon Han, Md. (Liton) Kamruzzaman, 2020-04-03

This book aims to contribute to the conceptual and practical knowledge pools in order to improve the research and practice on the sustainable development of smart cities by bringing an informed understanding of the subject to scholars, policymakers and practitioners. This book seeks articles offering insights into the sustainable development of smart cities by providing in-depth conceptual analyses and detailed case study descriptions and empirical investigations. This way the book will form a repository of relevant information material and knowledge to support research, policymaking practice and transferability of experiences to address aforementioned challenges. The scope of the book includes the following broad areas with a particular focus on the approaches, advances and applications in the sustainable development of smart cities: Theoretical underpinnings and analytical and policy frameworks; Methodological approaches for the evaluation of smart and sustainable cities; Technological developments in the techno-enviro-nexus; Global best practice smart city case investigations and reports; Geo design and applications concerning desired urban outcomes; Prospects, implications and impacts concerning the future of smart and sustainable cities.

**Handbook of Water Harvesting and Conservation** Saeid Eslamian, Faezeh Eslamian, 2020-12-10. Water harvesting is gaining more and more recognition as a sustainable and resilient water supply option. It is economically viable, socially compatible and environmentally friendly. Water harvesting has proven to be a robust solution to overcome or reduce water shortages all over the world. It is important to understand how to apply this practice in a sustainable and effective way to make full use of its potential in a world increasingly threatened by water scarcity. The Handbook of Water Harvesting and Conservation: Basic Concepts and Fundamentals is the most comprehensive up-to-date and applied handbook on water harvesting and conservation yet published. The book's 30 chapters, written by 84 outstanding international experts from approximately 20 selected countries, explore, critique and develop concepts and systems for water harvesting. The editors bring together many perspectives into a synthesis that is both academically based and practical in its potential applications. The Handbook of Water Harvesting and Conservation: Basic Concepts and Fundamentals is an important tool for education, research and technical works in the areas of soil water and watershed management and is highly useful for drought strategy planning, flood management and developing techniques to adapt to climate change in urban, agricultural, forest and rangeland areas.

Dry Urbanism Rob Roggema, 2025-01-01. The ambition of the book is to give a contemporary insight in the state of the art when it comes to designing our cities and landscapes for dry conditions. Water or the absence thereof is an important issue to consider. Many cities around the world are increasingly suffering from heat, droughts and occasional severe flooding and rainfall. This asks for new approaches and methodologies to redesign the urban and rural condition to stay livable. This book aims to connect theories, the methodologies and approaches with practice, concrete examples and projects.
