How the World's Religions

are Responding to Climate Change Robin Globus Veldman, Andrew Szasz, Randolph Haluza-DeLay, 2013-09-11 A growing chorus of voices has suggested that the world's religions may become critical actors as the climate crisis unfolds particularly in light of international paralysis on the issue. In recent years many faiths have begun to address climate change and its consequences for human societies especially the world's poor. This is the first volume to use social science to examine how religions are helping to address one of the most significant and far reaching challenges of our time. While there is a growing literature in theology and ethics about climate change and religion little research has been previously published about the ways in which religious institutions groups and individuals are responding to the problem of climate change. Seventeen research driven chapters are written by sociologists anthropologists geographers and other social scientists. This book explores what effects religions are having what barriers they are running into or creating and what this means for the global struggle to address climate change.

The Theological and Ecological Vision of Laudato Si', 2017-07-27 This volume provides a comprehensive introduction to the spiritual moral and practical themes of Pope Francis' encyclical *Laudato Si'*. Leading theologians ethicists scientists and economists provide accessible overviews of the encyclical's major teachings the science it engages and the policies required to address the climate crisis. Chapters on the encyclical's theological and moral teachings situate them within the Christian tradition and papal teaching. Science and policy chapters engaging the encyclical and provide introductions to the Fifth Assessment Report of the Intergovernmental Panel on Climate Change. The book provides a guide for those wishing to explore the issues raised by *Laudato Si'* but who lack the specialist knowledge required to know where to begin. Aimed at an undergraduate audience this book provides a reliable introduction to the major themes of *Laudato Si'* such as a theology of Creation that embraces the insights of contemporary science a renewed understanding of the human person in relationship to the rest of creation a spiritual vision of love and responsibility for all creation the necessary connection between Christian solidarity with the poor and concern for the environment an introduction to the social encyclical tradition from which *Laudato Si'* both draws and develops.

Theologies of Failure Robert Sirvent, Duncan B. Reyburn, 2020-01-01 What does failure mean for theology? In the Bible we find some unsettling answers to this question. We find lastness usurping firstness and foolishness undoing wisdom. We discover too a weakness more potent than strength and a loss of life that is essential to finding life. Jesus himself offers an array of paradoxes and puzzles through his life and teachings. He even submits himself to humiliation and death to show the cosmos the true meaning of victory. As David Bentley Hart observes most of us would find Christians truly cast in the New Testament mold fairly obnoxious civically reprobate ideologically unsound economically destructive politically irresponsible socially discreditable and really just a bit indecent. By incorporating the work of scholars working with a range of frameworks within the Christian tradition *Theologies of Failure* aims to offer a unique and important contribution on understanding and embracing failure as a pivotal theological category. As the various contributors highlight it is a category with a powerful capacity for illuminating our theological concerns and

perspectives It is a category that frees us to see old ideas in a brand new light and helps to foster an awareness of ideas that certain modes of analysis may have obscured from our vision In short this book invites readers to consider how both theology and failure can help us ask new questions discover new possibilities and refuse the ways of the world Cascading Challenges in the Global Water Crisis Gerard Magill,James Benedict,2019-02-11 This edited book is a collection of essays presented at the 3rd annual endowed conference held at Duquesne University USA The conference series addresses emerging concerns and threshold problems about the sustainability of our planet The contributions gathered here highlight the inter relation of topics and expertise from the perspectives of science and policy religion and ethics and pivotal global issues The book concludes with an ethical analysis of the multiple and over lapping challenges to paramount concerns that require urgent attention and long term resolution The book is written for scholars and students in a variety of disciplines and fields that deal with the earth s current survival and future flourishing **Earthkeeping and Character** Steven Bouma-Prediger,2019-11-19 Addressing a topic of growing and vital concern this book asks us to reconsider how we think about the natural world and our place in it Steven Bouma Prediger brings ecotheology into conversation with the emerging field of environmental virtue ethics exploring the character traits and virtues required for Christians to be responsible keepers of the earth and to flourish in the challenging decades to come He shows how virtue ethics can enrich Christian environmentalism helping readers think and act in ways that rightly value creation **The Cosmic Common Good** Daniel P. Scheid,2016 In this book Daniel Scheid draws on Catholic social thought as a foundation for a new type of interreligious ecological ethics which he calls the cosmic common good By placing this concept in dialogue with tenets from other spiritual traditions such as Hindu dharmic ecology Buddhist interdependence and American Indian balance Scheid constructs a theologically authentic moral framework that re envisions humanity s role in the universe **Christian Theology and the Status of Animals** R. McLaughlin,2014-02-13 The author argues that there are conflicting traditions with regard to the question of what is the moral standing of animals according to Christianity The dominant tradition maintains that animals are primarily resources but there are alternative strands of Christian thought that challenge this view **Journal of Moral Theology, Volume 3, Number 2** John Berkman,Charles Camosy,Celia E. Animal Rights James E Helmer *Religious Ethics* William Schweiker, David A. Clairmont, 2020-04-14 An inclusive and innovative account of religious ethical thinking and acting in the world Rather than merely applying existing forms of philosophical ethics *Religious Ethics* defines the meaning of the field and presents a distinct and original method for ethical reflection through comparisons of world religious traditions Written by leading scholars and educators in the field this unique volume offers an innovative approach that reveals how religions concur and differ on moral matters and provides practical guidance on thinking and living ethically The book s innovative method integrating descriptive normative practical fundamental and metaethical dimensions of reflection enables a far more complex and nuanced exploration of religious ethics than any single philosophical language method or theory can equal First introducing the task of religious ethics the book moves through each of the five dimensions of reflection to compare concepts such as good and evil perplexity and wisdom truth and illusion and freedom and bondage in various theological contexts Guides readers on understanding assessing and comparing the moral teachings and practices of world religions Applies a disciplined scholarly approach to the subject of religious ethics Explores the distinctions between religious ethics and moral philosophy Provides a methodology which can be applied to comparative ethics for various religions Compares religious traditions to illuminate each of the five dimensions of ethical and moral reflection *Religious Ethics* Meaning and Method will help anyone interested in the relation between religion and ethics in the modern world including those involved in general and comparative religion studies religious and comparative ethics and moral theory Translating Religion Mary Doak, Anita Houck, 2013 A peer reviewed original collection of essays on how faith and religious traditions have been and are being translated whether by language culture context migration or many other factors **Religion and Environmentalism** Lora Stone, 2020-07-01 A foundational resource for readers investigating religiously motivated environmentalism this book provides both a global overview of the subject and a detailed discussion of key figures concepts organizations events and documents Beginning in the late 1960s a growing number of activists scholars and scientists asserted that traditional religions had been major contributors to the environmental crisis In response theologians religious organizations and religiously motivated activists became increasingly involved in environmental issues At the same time emerging nature based belief systems emphasized values and lifestyles based in environmentalism More recently religiously motivated environmentalism has become a powerful force in shaping environmental policy and human action globally and has joined with secular environmentalism to address related issues This book explores the background and current state of religious environmentalism The book begins with an overview essay examining the history and context of religious environmentalism and its significance today A chronology then profiles the most important events related to religious environmentalism A section of more than 50 alphabetically arranged reference entries follows with each entry providing objective information about people places events movements works and other topics The entries include cross references and suggestions for further reading and the book closes with a selected annotated

bibliography of major works **The Wiley Blackwell Companion to Religion and Ecology** John Hart, 2017-03-24 In the face of the current environmental crisis which clearly has moral and spiritual dimensions members of all the world's faiths have come to recognize the critical importance of religion's relationship to ecology The Wiley Blackwell Companion to Religion and Ecology offers a comprehensive overview of the history and the latest developments in religious engagement with environmental issues throughout the world Newly commissioned essays from noted scholars of diverse faiths and scientific traditions present the most cutting edge thinking on religion's relationship to the environment Initial readings explore the ways traditional concepts of nature in Christianity Judaism Islam Buddhism and other religious traditions have been shaped by the environmental crisis Readings then address the changing nature of theology and religious thought in response to the challenges of protecting the environment Various conceptual issues and themes that transcend individual traditions climate change bio ethics social justice ecofeminism and more are then analyzed before a final section examines some of the immediate challenges we face in caring for the Earth while looking to the future of religious environmentalism Timely and thought provoking Companion to Religion and Ecology offers illuminating insights into the role of religion in the ongoing struggle to secure the future well being of our natural world With a foreword by Ecumenical Patriarch Bartholomew I and an Afterword by John Cobb Eden's Other Residents Michael Gilmour, 2014-06-20 The Bible teems with nonhuman life from its opening pages with God's creation of animals on the same day and out of the same earth as humans to its closing apocalyptic scenes of horses riding out of the sky Animals are Adam's companions Noah's shipmates and Elijah's saviors They are at the center of ancient Israel's religious life as sacrifices and yet as Job discovers beyond human dominion It is an animal that saves Balaam from certain death by an angel's hand and an animal that carries Jesus into Jerusalem The Creator declares all of them good at the beginning and since the Apostle Paul writes of God's eternal purposes for all things on earth they are somehow part of a hoped for eschatological restoration So why are animals so often ignored in Christian moral discourse In its theological thinking and faith motivated praxis human centeredness typically results in the complete erasure of the nonhuman This book argues that this exclusion of animals is problematic for those who see the Bible as authoritative for the religious life Instead biblical literature bears witness to a more inclusive understanding of moral duty and faith motivated largesse that extends also to Eden's other residents **Recovering Environmental and Economic Traditions in the Islamic World** , 2024-10-21 Recovering Environmental and Economic Traditions in the Islamic World is an interdisciplinary volume that interrogates varied approaches to environmental and economic thought in classical Islam and in a few contemporary case studies The contributions in this volume critique the dominant economic system and its perspective on the environment as a commodity across the boundaries of multiple intellectual traditions and academic fields The book analyses both historical trajectories and modern schools of thought while simultaneously exploring ethical applications to environmental and economic discourses as a tool of critique In this context the authors conceptualize and treat these

discourses as polyvalent and enmeshed with various political ethical and cosmological perspectives and vistas *On Earth as It Is in Heaven* David Vincent Meconi S.J.,2016 With the recent publication of Pope Francis s encyclical *Laudato Si* many people of faith have found themselves challenged to seek new ways of responding to serious ecological questions essential to the flourishing of all creatures *On Earth as It Is in Heaven* brings together fifteen top scholars to consider pressing contemporary environmental concerns through the lens of Catholic theology Drawing from ancient Christian sources the contributors delve into such diverse topics as equitable food distribution responsible procreation land stewardship evolutionary theodicy and poverty and providence A concluding essay addresses the liturgy as the space in which all creation is consecrated before the cross of Christ Allowing the earliest Church Fathers and voices from the Christian tradition to speak to our unique circumstances today this engaging volume shows that ancient creedal Christianity contains important insights into caring for God s creation **Just Sustainability** Christiana Peppard, Andrea Vincini ,2015-03-01
