

Macleod's Clinical Examination

Thirteenth Edition

This classic textbook sets out how to take a patient history, evaluate symptoms and elicit the relevant physical signs. The text covers special situations such as the examination of babies, children and the critically ill. The book is essential reading for medical students, nurse practitioners and paramedics as well as practising doctors, particularly those sitting postgraduate examinations.

'Highly Commended' in the British Medical Association Medical Book Competition, this **Thirteenth Edition** is written by a team of editors and contributors who are all experienced clinicians and experts in their specialist fields.

Changes for this Thirteenth Edition

- There are two new chapters on the particular skills required when examining frail elderly and febrile adults.
- A new section explicitly spells out how to demonstrate techniques learned from the book in OSCE and other examinations.
- 50 new text boxes highlight the evidence-base for the examination techniques discussed.
- The Advisory Board of students, junior doctors, and representatives from the nursing, ambulance, primary care and academic communities from six countries has made detailed comments and critically appraised the entire book.

"This is the best book on clinical examination currently available"

British Medical Association Medical Book Competition, 2006

Videos of clinical skills

Purchase of this book allows you to view 28 clinical examination videos and watch clinicians performing many of the examination routines described in the text. Narrated by the Editor, Professor Colin Robertson, these bridge the gap between textbook learning and bedside teaching. The videos are also linked to the online text allowing you to watch the relevant examination sequences as you progress through each chapter.

Two videos added for this edition show how to perform the Glasgow Coma Scale in clinical situations, demonstrating correct techniques and illustrating common pitfalls.
