Heterodox Challenges in Economics Sergio Cesaratto, 2020-11-12. This book discloses the economic foundations of European fiscal and monetary policies by introducing readers to an array of alternative approaches in economics. It presents various heterodox theories put forward by classical economists Marx, Sraffa and Keynes as a coherent challenge to neo-classical theory. The book underscores and critically assesses the analytical inconsistencies of European economic policy and the conservative nature of the current European governance. In this light, it examines the political obstacles to proposals to reform the European monetary union as well as those originating in the neo-mercantilist German model. Given its scope and format, the book offers a valuable asset for researchers and members of the general public alike.

Intergenerational Wellbeing and Public Policy Girol Karacaoglu, Jacek B. Krawczyk, Anita King, 2019-01-28. The distinctive contribution of this book is the formulation of an integrated social, environmental and economic framework for public policy. This contribution is realised through investigations and conclusions in the following four domains: a formal stylised model that provides a platform for an integrated approach to public policy; a policy informing simulation model that can be used to operationalise the public policy insights proposed in the stylised model; the implications of introducing fundamental or radical uncertainty and complexity into the policy framework; and the use of viability theory to demonstrate how one can think of and implement public policy in

an uncertain and complex world when the focus of policy needs to shift to building resilience to systemic risks The book's stylised model is constructed by weaving together threads from the wellbeing human needs complex systems sustainable development endogenous economic growth directed technical change and credit based money literatures Throughout the perspective is that of a policy adviser to a wellbeing state as distinct from a welfare state The key linkages or relationships in the model are supported by empirical evidence that draws on the wider literature in related fields
