Industrialization in Ethiopia: Awakening - Crisis - Outlooks Reimer Gronemeyer, Michaela Fink, 2023-11-23 Ethiopia though remaining one of the least urbanised countries in the world has taken impressive actions to transform the state into a more industrialized nation Several industrial parks have been built in recent years throughout the whole country The textile sector is one of these sectors The textile industry is expected to provide employment for hundreds of thousands and thus improve people's living conditions and contribute to the development of the country Major reason for Asian investors to shift

their focus to Ethiopia are extremely low wages and the lower production costs involved. The Ethiopian textile industry has to deal with high rates of labor turnover and absenteeism. From the perspective of the mostly international managers, the reason for turnover and absenteeism is often attributed to the mindset of the predominantly female workforce. A research project financed by the German Bundesministerium für wirtschaftliche Zusammenarbeit und Entwicklung is looking at reasons and possible measures to solve this problem. Results of this project conducted at the University of Giessen by Michaela Fink and Reimer Gronemeyer together with Ethiopian colleagues are presented in this book. Experts from Ethiopia and Germany are presenting the history of the textile industry in Ethiopia and the coming development. All this is framed by the discussion of present crisis Covid 19, the war in Ethiopia.

Regional Integration, Trade and Industry in Africa Helmut

Asche, 2021-06-14 This book examines the past, present and prospects of regional economic integration in Africa. The empirical analysis ranges from unions formed during the years following independence to the proposed African Continental Free Trade Area AfCFTA which aims to remove trade barriers between all 55 African states. In addition, the book explores to what extent Africa's Regional Economic Communities RECs have advanced in accordance with a linear integration model of goods, labor and capital markets. The book subsequently evaluates the suitability of the European model of deep integration with costly institutions for the conditions specific to Africa, considering for example the role of informal and non-recorded trade. Stylized cases of regional division of labour with increasing returns and imperfect competition are introduced to support the economic integration logic. Past and current economic policies in Africa are scrutinized to answer the question how can African regions best foster new manufacturing industries and value chains across the continent. In conclusion, the book outlines content and processes of Common Industrial Policy in the African regions. The book also addresses the controversial issue of international trade agreements between developing countries and the European Union or the USA and investigates whether these agreements impede or promote economic development in Africa. The book includes a detailed roadmap describing how to improve key clauses of agreements for economic partnership in the interest of African countries. In closing, it outlines a new vision of joint sustainable development for Africa and Europe.

The Politics of Social Protection in Eastern and Southern Africa Sam Hickey, Tom Lavers, Miguel Nino-Zarazua, 2020 Why have so many countries in Africa adopted social protection programmes over the past decade? This book challenges the common assumption that this phenomenon has been entirely driven by international development agencies, instead focusing on the critical role of political dynamics within specific African countries.
