Allemagne Evelyn Gustedt, Ulrike Grabski-Kieron, Christophe Demazière, Didier Paris, 2023-03-09 In both countries France and Germany there is great pressure to change and adapt towards new forms of urbanity and to conceive new strategic approaches with limited public finance and a need for economic efficiency Not all types of urban areas are equally affected by these issues The book aims to do justice to this situation considering in both cases the context of the national urban systems As it proved impossible to address all the topics relevant to the spatial development of urban and rural areas the authors decided to concentrate on a number of important topical themes which are undoubtedly relevant in both countries albeit in different ways and which could be significant for a comparison The focus is thus on issues related to metropolises small and medium sized towns and particularly current issues of urbanity sustainability Smart Cities transport and mobility and the role of cross border urban development The structure of the chapters is conceived in these terms Besides scientific and theoretical approaches the authors also consider the practical planning perspective and methodological aspects of the topic at hand They mainly address three relevant factors the differences between the two institutional systems the development paths and historical constants and how new challenges are addressed on both sides of the border *Social*

Grande Grammaire Historique du Français (GGHF) Christiane Marchello-Nizia, Bernard Combettes, Sophie Prévost, Tobias Scheer, 2020-11-09 The existing major works on the history of the French language were published more than fifty years ago and are characterized by a largely a theoretical approach More than a hundred years after Ferdinand Brunot began to publish his monumental work the ambition of the Grande Grammaire Historique du Français GGHF is to present the evolution of the French language in its totality building on the contributions achieved by descriptive and theoretical research in recent decades It also offers several innovative aspects The GGHF is a grammar organized by themes rather than by periods and it reflects all major areas currently under debate in linguistics phonetics phonology morphology syntax semantics etc In addition it is based on a balanced corpus of several million words that has been designed especially for the GGHF with a selection of representative texts for each century The consideration of this corpus and the quantification of facts enable the authors to establish a close relationship between variation and change we believe that the interaction of these two aspects is

the cornerstone for the interpretation of the evolution of French and of language in general In addition to the description of the evolution of French the analysis of language change thus also aims to contribute to the study of the evolution of language as such
