Fostering Culture Through Film Elda Buonanno Foley, Patrizia Comello Perry, 2016-05-11 The perceived lack of understanding of cultural diversity in the American learning community has led instructors to challenge assumptions and stereotypes while addressing misconceptions Teachers of foreign languages and cultural studies in particular feel the need to redesign curricula and lesson plans to better serve the learning community of the twenty first century The common starting point resides in the paradox that exists in today's connected world while global access to information makes learners aware of the infinite variety of cultural diversity it does not however make them critical thinkers For this reason there is opportunity to reshape critical thinking within a more global perspective while enhancing the tools to identify interpret and compare the different cultural models that learners encounter The book demonstrates the theories and practical applications by which instructors use contemporary film to provide insightful readings on diverse local communities communities that form the basis of global culture This collection of essays will serve as a pedagogical tool and resource offering methods and examples of a communicative approach to analyze and integrate cultural diversities similarities and problems in the second language curricula methods that expose students to different cultural models while scaffolding their critical approach to multiple layers of common and specific values This work will encourage a dialogue and long lasting conversation on methodologies and teaching strategies rethought reapplied and remolded to the new learning environments

British Government in Crisis Christopher Foster,2005-03-15 Why are we badly governed Why has a system of government the envy of the world

as recently as the 1970s developed so many defects Why is there such a gulf between political classes who seem to believe the position satisfactory or inevitable and the general public increasingly disaffected by politics and government This book argues that the defects are not attributable to one political party Some factors are outside politicians control the globalization of economic activity the changes in international politics after the end of Soviet Russia the adverse consequences of more dominating and competitive media Some other factors are widely recognized the decline of the cabinet and the marginalizing of Parliament the influence of spin on our political culture the increased role of political and special advisers But others are not as well understood Among them are the decline in the authority of many ministers the undermining of the constitutional position and consequent effectiveness of the civil service the fragmentation of government and the public sector into a mass of bodies with complex but ill defined relations between them and the ramifying of a system of government which despite its protestations is less interested in delivering results than managing news The book traces these developments especially over the last 25 years but most intensively since 1997 It looks to a major change in the ways of government It doubts whether a change of prime minister or party would remove current defects It considers other possible alternatives particularly a constitutional change to a presidential system of government or the introduction of a legal constitution It concludes by arguing that although venturing in new and untried directions might seem attractive improvement radical improvement of the system we have is more likely to achieve better government and restore public confidence
