Ecocritical Approaches to Literature in French Douglas L. Boudreau, Marnie M. Sullivan, 2015-12-24 Ecocriticism is a critical approach that focuses on the representation in literature of the non human elements of the natural world a method of inquiry that has been largely limited to literature written in English The aim of Ecocritical Approaches to Literature in French is twofold to introduce ecocriticism to scholars of French language literature and to open ecocriticism to the vision and voices of French literature The chapters look at work not only from France but also from North America the Caribbean and Africa The discussions include fiction poetry film and pedagogy The goal of the collection is to demonstrate not only the applicability of ecocritical inquiry to literature in French but to demonstrate the possibilities of ecocritical theory on the study of French literature and also for ecocriticism itself This collection will be a useful resource both for scholars of French language literature and also for ecocritics who may have had only limited contact with literatures in languages other than English

Interdisciplinary Essays on Environment and Culture Luigi Manca, Jean-Marie Kauth, 2015-12-24 This is a collection of essays about the media the environment and the whole of humanity at the brink of extinction As the demands of overpopulation and of an unsustainable consumer economy dry up

existing natural resources and destroy vital ecosystems that we need to survive the corporate controlled media saturate worldwide audiences with a barrage of hypnotic images and narratives to stimulate over consumption and to distract us from the consequences of rampant consumerism while remaining silent about the systematic destruction of the environment and our future Academicians from the across the sciences the social sciences the arts and the humanities engage in an interdisciplinary discussion informed by a vision of an interconnected humanity and focused on the role of the media in forging public discourse Contributors to the collection argue that today s media are failing humanity Rather than providing pictures of reality on which the world s citizens can act the corporate controlled media are widely used as instruments of commercial and political propaganda creating an immense web of images and narratives that their creators know to be not true fabrications designed to sell to manipulate in a sense to enslave worldwide audiences At the core of the discussion in this book is a utopian vision of one unified humanity billions of people whose destinies and dreams are imbricated and interdependent and who share the same world the same habitats It is a vision of a world that cherishes diversity but is also united a world where our differences are no longer a cause for conflict and where separate countries or separate ethnic or religious communities no longer have to compete or wage war to exploit available resources As extensions of humans the media can be instruments of salvation instead of destruction liberation instead of oppression But first we must recognize the challenges we face

Writing the Earth, Darkly Isabel Hoving, 2017-02-08 Why do we find so many references to nature and the environment in the many Caribbean literary texts that try to come to terms with the contemporary age of globalization Even when these novels and poems do not seem to be concerned with environmental issues at all they abound with fragrant creepy or dark references to flowers insects trees gardens and mud This book discusses a range of Anglophone and Dutch language Caribbean literary texts to propose an answer It shows that some writers evoke nature to question oppressive notions of what is natural and what is not when it comes to race gender and desire Other writers choose to counter the destructive dichotomies of wildness order nature culture nature human that marked colonialism Instead they represent the environment as a field of interconnectedness marked by intense semiotic interaction in which human beings are also implicated But writing about nature can also be a means to reconnect with the very foundations of life itself In the most dramatic cases references to nature evoke an extra discursive space that then functions to subvert existing discourses That space may even mark the site of the annihilation of discourse or of the self These texts suggest that in times of globalization it is only the dark queer turn to matter that will free the path to imagining human existence in a new way The book s proposal to understand some of these fascinating texts as an effort to relate to the mind baffling explosive real is inspired by postcolonial trauma theory posthumanism and new materialism However Caribbean literature is a layered practice that does much more than merely explore the world s materiality It works simultaneously as cultural critique counter discourse and as the manipulation of affect This book therefore brings together ecocriticism with Caribbean and postcolonial studies the study

of globalization trauma theory the study of gender and sexuality posthumanism and new materialism to bring out the full complexity of these wise texts Thus it hopes to show its readers their extraordinary innovative potential **T.S. Eliot, Poetry, and Earth** Etienne Terblanche,2016-05-12 T S Eliot enjoyed a profound relationship with Earth Criticism of his work does not suggest that this exists in his poetic oeuvre Writing into this gap Etienne Terblanche demonstrates that Eliot presents Earth as a process in which humans immerse themselves The Waste Land and Four Quartets in particular re locate the modern reader towards mindfulness of Earth s continuation and one s radical becoming within that process But what are the potential implications for ecocriticism Based on its careful reading of the poems from a new material perspective this book shows how vital it has become for ecocriticism to be skeptical about the extent of its skepticism to follow instead the twentieth century s most important poet who at the end of searing skepticism finds affirmation of Earth art and real presence

our relationship with the natural sphere This scholarly collection serves as a compass guiding readers through the uncharted territories of environmental scholarship or revisiting existing study through fresh critical perspectives Eco Concepts strives to become an essential source of reference for academics students and individuals seeking an in depth exploration of the innovative notions influencing the trajectory of discussions on ecology
