

The book cover features a collage of green and yellow geometric shapes. National symbols are integrated into the design: a green maple leaf in the top left, a stylized American flag (stars and stripes) to the right of the title, a portion of the European Union flag (a circle of stars) at the bottom left, and a portion of the United Kingdom flag (Union Jack) on the left side. The title is centered in a bold, black, sans-serif font.

GREENING THE GLOBAL ECONOMY

Greening The Global Economy Boston Review S:

Greening the Global Economy Robert Pollin, 2015-11-20 A program for building a global clean energy economy while expanding job opportunities and economic well being In order to control climate change the International Panel on Climate Change IPCC estimates that greenhouse gas emissions will need to fall by about forty percent by 2030 Achieving the target goals will be highly challenging Yet in *Greening the Global Economy* economist Robert Pollin shows that they are attainable through steady large scale investments totaling about 1.5 percent of global GDP on an annual basis in both energy efficiency and clean renewable energy sources Not only that Pollin argues that with the right investments these efforts will expand employment and drive economic growth Drawing on years of research Pollin explores all aspects of the problem how much energy will be needed in a range of industrialized and developing economies what efficiency targets should be and what kinds of industrial policy will maximize investment and support private and public partnerships in green growth so that a clean energy transformation can unfold without broad subsidies All too frequently inaction on climate change is blamed on its potential harm to the economy Pollin shows greening the economy is not only possible but necessary global economic growth depends on it

Handbook on the Economics of Climate Change Graciela Chichilnisky, Armon Rezai, 2020-06-26 This timely Handbook recognises the emergence of climate change as the defining topic of our time With public climate discourse growing more urgent every year this Handbook brings together international experts from different economic disciplines to answer critical climate policy questions

The Case for the Green New Deal Ann Pettifor, 2020-09-15 What is the Green New Deal and how can we afford it To protect the future of life on earth we need to do more than just reimagine the economy we have to change everything One of the seminal thinkers of the program that helped ignite the US Green New Deal campaign Ann Pettifor explains how we can afford what we can do and what we need to do before it is too late The Case for the Green New Deal argues that economic change is wholly possible based on the understanding that finance the economy and the ecosystem are all tightly bound together The GND demands total decarbonization and a commitment to an economy based on fairness and social justice It proposes a radical new understanding of the international monetary system Pettifor offers a roadmap for financial reform both nationally and globally taking the economy back from the 1% This is a radical urgent manifesto that we must act on now

OECD Public Governance Reviews Harnessing Public Procurement for the Green Transition Good Practices in OECD Countries OECD, 2024-06-26 This report presents the results of the 2022 OECD Green Public Procurement GPP Survey to which 38 countries OECD Member and accession candidate countries responded The aim of the survey was to better understand how public procurement a significant economic lever is being used to generate environmental benefits The report is organized around four areas green public procurement policy and strategic framework public private interactions on green public procurement the monitoring and the evaluation of green public procurement and building capacity and support for green public procurement Developments in GPP since the survey was

completed in 2022 are included in the country specific factsheets annexed to the report

The Limits of the Green Economy Anneleen Kenis, Matthias Lievens, 2015-03-24 Projecting win win situations new economic opportunities green growth and innovative partnerships the green economy discourse has quickly gained centre stage in international environmental governance and policymaking Its underlying message is attractive and optimistic if the market can become the tool for tackling climate change and other major ecological crises the fight against these crises can also be the royal road to solving the problems of the market But how green is the green economy And how social or democratic can it be This book examines how the emergence of this new discourse has fundamentally modified the terms of the environmental debate Interpreting the rise of green economy discourse as an attempt to re invent capitalism it unravels the different dimensions of the green economy and its limits from pricing carbon to emissions trading from sustainable consumption to technological innovation The book uses the innovative concept of post politics to provide a critical perspective on the way green economy discourse represents nature and society and their interaction and forecloses the imagination of alternative socio ecological possibilities As a way of repoliticising the debate the book advocates the construction of new political faultlines based on the demands for climate justice and democratic commons This book will be of interest to students and scholars of environmental politics political ecology human geography human ecology political theory philosophy and political economy Includes a foreword written by Erik Swyngedouw Professor of Geography Manchester University

China's Low-Carbon Energy Relations with Emerging Markets Ryan McLean, 2025-09-30 This book explores China s contemporary energy relations with emerging markets Through the prisms of global low carbon transition and power sector development Ryan McLean utilises the multi level perspective to build upon existing understandings of the Chinese renewables revolution from a top down interpretation McLean presents an in depth analysis of the external ramifications of China s solar and wind dominance across the Global South in the areas of green technological trade project construction and regime financing This research provides a convincing explanation for why Chinese coal incumbents have been proactive overseas in spite of the country s clean energy dominance and Beijing s climate commitments Finally the book argues that China s low carbon prowess has longer term significance for the Global South and in addition contributes to the rising debates over the geopolitics of renewable transition in a complex multipolar world This volume will be of great interest to students and scholars of Chinese energy policy and foreign relations energy markets in the Global South international politics and the wider global energy transition field

Busting the Bankers' Club Gerald Epstein, 2025-01-07 An eye opening account of the failures of our financial system the sources of its staying power and the path to meaningful economic reform Bankers brought the global economic system to its knees in 2007 and nearly did the same in 2020 Both times the US government bailed out the banks and left them in control How can we end this cycle of trillion dollar bailouts and make finance work for the rest of us Busting the Bankers Club confronts the powerful people and institutions that benefit from our broken financial system and the struggle to create an

alternative Drawing from decades of research on the history economics and politics of banking economist Gerald Epstein shows that any meaningful reform will require breaking up this club of politicians economists lawyers and CEOs who sustain the status quo Thankfully there are thousands of activists experts and public officials who are working to do just that Clear eyed and hopeful Busting the Bankers Club centers the individuals and groups fighting for a financial system that will better serve the needs of the marginalized and support important transitions to a greener fairer economy *Handbook on Green Growth* Roger Fouquet,2019 Economies around the world have arrived at a critical juncture to continue to grow fuelled by fossil fuels and exacerbate climate change or to move towards more sustainable greener growth Choosing the latter is shown to help address climate change as well as present new economic opportunities This Handbook provides a deeper understanding of the concept of green growth and highlights key lessons from the experience of green transformations across the world following a decade of ambitious stimulus packages and green reforms *The American Monthly Review of Reviews* Albert Shaw,1903 **American Monthly Review of Reviews** Albert Shaw,1929 Development and Social Change Philip McMichael,Heloise Weber,2024-12-17 Development and Social Change explores the historical socio political and ecological aspects of development The Eighth Edition critically engages with the concept of development tracing its roots and examining its implications in the contemporary world Authors Philip McMichael and Heloise Weber use case studies and examples to help describe a complex world in transition Students are encouraged to see global development as a contested historical project By showing how development stems from unequal power relationships between and among peoples and states often with planet threatening environmental outcomes it enables readers to reflect on the possibilities for more just social ecological and political relations **Green Economy Reader** Stanislav Shmelev,2016-09-22 State of the art in sustainability thinking inspired by interdisciplinary ideas of ecological economics This book is focusing on sustainability pathways new economic theory democracy and institutions multidimensional assessment of sustainability macroeconomic modelling and policies climate change and renewable energy resource flows and circular economy regenerative cities environmental conflicts and values It will be helpful for MSc and PhD students in Economics Management Environmental Change Ecological Economics Development Economics Sustainability and practitioners in business international and nongovernmental organizations Rich diverse and thought provoking collection of top level contributions it will help to facilitate the transition towards sustainability and educational reform A fabulous composition of papers by the authors who really count Ernst von Weizs cker The Club of Rome The authors present a refreshing perspective on the possibilities of human progress in harmony with nature without the need for economic growth to secure long term human welfare and wise use of nature s services Extremely relevant Peter May Past President International Society for Ecological Economics and Professor UFRRJ Rio de Janeiro Brazil The book goes well beyond the Green Economy offering arguments and blueprints for a complete makeover of the current economic system With multi and interdisciplinary contributions ranging from moderately

to fundamentally critical of current economics it raises fundamental questions of value and power draws on a wide range of theories opens the eyes for the historical processes that brought about the current crises and demonstrates the value of ecological but also classical economic thinking to their solution If better politics require better theories this is a must read for academics and decision makers in the time of climate crisis Joachim Spangenberg Sustainable Europe Research Institute SERI Germany e V *The American Monthly Review of Reviews* ,1903 **Global Business Regulation** John Braithwaite,Peter Drahos,2000-02 This book confronts the question of how the regulation of business has shifted from national to global institutions Based on interviews with 500 international leaders in business and government this book examines the role played by global institutions such as the WTO IMF and the World Bank as well as various NGOs and significant individuals The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision making bodies that would otherwise be dominated by concentrated economic interests Handbook of Environmental Impact Assessment Fonseca, Alberto,2022-09-08 Reviewing over 50 years of Environmental Impact Assessment EIA policy making and implementation around the world this thought provoking Handbook provides a comprehensive overview of the current research surrounding EIA Presenting new trends in law and policy making it highlights best practices in the application of technology to impact prediction and management procedural efficiency decision making and public participation Proceedings of the 7th International Conference on Economic Management and Green Development Xiaolong Li,Chunhui Yuan,John Kent,2024-02-26 Economics has always been a heated research topic and green development is rising and integrating with various fields for interdisciplinary studies Initiated in 2017 the International Conference on Economic Management and Green Development ICEMGD is an annual conference aiming at bringing together researchers from the fields of economics business management public administration and green development for the sharing of research methods and theoretical breakthroughs The 7th International Conference on Economic Management and Green Development ICEMGD 2023 was held on August 6 2023 It was a hybrid conference including several on site workshops and an online session The workshops were held in London Gala i Birmingham Sydney and Beijing The proceedings consist of papers accepted by ICEMGD 2023 which are carefully selected and reviewed by professional reviewers from corresponding research fields and the editing committee of the conference The papers have a diverse range of topics situated at the intersecting fields of economic management public administration and green development ICEMGD is working to provide a platform for international participants from fields like macro and microeconomics international economics finance agricultural economics health economics business management and marketing strategies regional development studies social governance and sustainable development This proceedings volume together with the conference looks forward to sparking inspiration and promoting collaborations This book will be of interest to researchers academics professionals and policymakers in the fields of economic management public administration and

development studies *Handbook of Global Environmental Politics* Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship *Handbook of Global Environmental Politics Second Edition* is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come **Greening of Capitalism** John A. Mathews, 2014-12-17 As China India and other industrializing giants grow they are confronted with an inconvenient truth They cannot rely on the conventions of capitalism as we know them today Western industrialism has achieved miracles promoting unprecedented levels of prosperity and raising hundreds of millions out of poverty Yet if allowed to proceed unencumbered this paradigm will do irreversible harm to the planet By necessity a new approach to environmentally conscious development is already emerging in the East with China leading the way Positioning its argument against zero growth advocates and free market environmentalists *Greening of Capitalism* charts this transformation and sketches out a framework for more sustainable capitalism State mandated changes in energy use as opposed to carbon taxes a circular flow of resources as opposed to emissions standards and the introduction of new financial instruments that support green growth are cornerstones of China's framework John A Mathews argues that these tenets will be emulated around the world first in India and Brazil In light of this emerging shift Mathews considers core debates over national security international relations and economic policy ultimately addressing the question of whether these measures will be far reaching or timely enough to prevent further damage Small, Gritty, and Green Catherine Tumber, 2011-11-10 How small to midsize Rust Belt cities can play a crucial role in a low carbon sustainable and relocalized future America's once vibrant small to midsize cities Syracuse Worcester Akron Flint Rockford and others increasingly resemble urban wastelands Gutted by deindustrialization outsourcing and middle class flight disproportionately devastated by metro freeway systems that laid waste to the urban fabric and displaced the working poor small industrial cities seem to be part of America's past not its future And yet Catherine Tumber argues in this provocative book America's gritty Rust Belt cities could play a central role in a greener low

carbon relocalized future As we wean ourselves from fossil fuels and realize the environmental costs of suburban sprawl we will see that small cities offer many assets for sustainable living not shared by their big city or small town counterparts including population density and nearby fertile farmland available for new environmentally friendly uses Tumber traveled to twenty five cities in the Northeast and Midwest from Buffalo to Peoria to Detroit to Rochester interviewing planners city officials and activists and weaving their stories into this exploration of small scale urbanism Smaller cities can be a critical part of a sustainable future and a productive green economy Small Gritty and Green will help us develop the moral and political imagination we need to realize this
