Indiana Farmer's Guide, 1921. *The Global Action for Fall Armyworm Control: A resource mobilization guide* Food and Agriculture Organization of the United Nations, 2022-03-09. Fall Armyworm (FAW) *Spodoptera frugiperda* is a pest originating in the Americas; it can fly over 100 km per day, it feeds on over 80 hosts, and a female moth can deposit 1,000 eggs during its life. Challenges in mitigating FAW damage include, among others, lack of the following: coordination at global, regional, and national levels; effective monitoring and control techniques; and effective phytosanitary measures and capacity at national level. The Global Action for Fall Armyworm Control (GA) 2020-2022 was launched by FAO Director General QU Dongyu on 4 December 2019 with a mandate for a strong and coordinated approach to strengthen prevention and sustainable pest control capacities. The GA focuses on Africa, Asia Pacific, and the Near East, where an integrated pest management (IPM) strategy will be implemented in countries with significant pest presence, and a prevention strategy will be conducted in areas with limited or no distribution of the pest. The GA has continued to support countries in managing FAW throughout the COVID-19 pandemic by conducting webinars and virtual trainings on FAW monitoring and management and by implementing activities where possible. The Resource Mobilization Guide is intended as a roadmap for use by key

stakeholders at regional and national levels to help them identify and engage with a diverse range of existing and potential resource mobilization partners on the critical importance of FAW control for a wide range of sustainable development outcomes
