<u>Complex Adaptive Innovation Systems</u> Philip Cooke,2013-06-19 Leading up to the financial crisis of 2008 and onwards the shortcomings of traditional models of regional economic and environmental development had become increasingly evident Rooted in the idea that policy is an encumbrance to free markets the stress on supply side smoothing measures such as clusters and an over reliance on venture capital the inadequacy of existing orthodoxies has come to be replaced by the

notion of Transversality This approach has three strong characteristics that differentiate it from its failing predecessor First as the name implies it seeks to finesse horizontal knowledge interactions as well as vertical ones thus building platforms of industrial interaction Secondly it is not a supply but a demand side model in which needs driven innovation rather than pure market competition prevails Finally it is ongoing through recessionary times being more robust than over specialised approaches to economic growth The intellectual origins of Transversality lie in an aspiration to promote eco innovation one of the key hopes of assisting Western regional and national economies to re balance and escape recession The policy models of key regional exponents of the concept are explored and their goals achievement is assessed An array of policy instruments and measures is presented for hands on policy implementation The book will be of vital interest to academics as teachers and researchers as well as policy advisers and public servants The Yankee Road James D.
