 States. Food and Drug Administration, 2009 Seafood Regulations Compliance Manual Andrew M. Welt, 2013-06-29 A first
 of its kind the Seafood Regulatory Compliance Manual is a comprehensive work that comprises the myriad of governmental
 requirements and guidelines applicable to all aspects of seafood from harvest to the marketplace The intent of the authors
 was to develop for users a manual that is easy to use with a structured format to ensure compliance with governmental
 requirements They have been highly successful in achieving this objective and presenting a user friendly tool The manual
 represents a major advancement by providing a single source reference to all requirements except for some specific end
 product and labeling requirements for a highly complex global industry In addition it is an outstanding contribution to the
 seafood industry in addressing a long standing need for systems changes in the form of a single source manual in contrast to
 the obsolete approach of having to access a library of multiple regulations and the affiliated agencies bureaucracies to
 determine how and or whether compliance with a particular regulation has been achieved For those engaged in international
 commerce in seafood the manual should be especially useful Well integrated throughout the manual are the applicable
 provisions of the recommended international Codex standards for fish and shellfish products and the codes of hygienic and
 technological practice for handling and processing these products These standards and codes were developed through an
 international harmonization process and are familiar to seafood producing countries worldwide *Building Effective Food*
