S. Tavares,Fuqian Shi,2022-07-28 This book provides a collection of the state of the art research attempts to tackle the challenges in image and signal processing from various novel and potential research perspectives The book investigates feature extraction techniques image enhancement methods reconstruction models object detection methods recommendation models deep and temporal feature analysis intelligent decision support systems and autonomous image detection models In addition to this the book also looks into the potential opportunities to monitor and control the global pandemic situations Image processing technology has progressed significantly in recent years and it has been commercialized worldwide to provide superior performance with enhanced computer machine vision video processing and pattern recognition capabilities Meanwhile machine learning systems like CNN and CapsNet get popular to provide better model hierarchical relationships and attempts to more closely mimic biological neural organization As machine learning systems prosper image processing and machine learning techniques will be tightly intertwined and continuously promote each other in real world settings Adopting this trend however the image processing researchers are faced with few image reconstruction analysis and segmentation challenges On the application side the orientation of the image features and noise removal has become a huge burden **The Data Bonanza** Malcolm Atkinson,Rob Baxter,Peter Brezany,Oscar Corcho,Michelle Galea,Mark Parsons,David Snelling,Jano van Hemert,2013-03-19 Complete guidance for mastering the tools and techniques of the digital revolution With the digital revolution opening up tremendous opportunities in many fields there is a growing need for skilled professionals who can develop data intensive systems and extract information and knowledge from them This book frames for the first time a new systematic approach for tackling the challenges of data intensive computing providing decision makers and technical experts alike with practical tools for dealing with our exploding data collections Emphasizing data intensive thinking and interdisciplinary collaboration The Data Bonanza Improving Knowledge Discovery in Science Engineering and Business examines the essential components of knowledge discovery surveys many of the current research efforts worldwide and points to new areas for innovation Complete with a wealth of examples and DISPEL based methods demonstrating how to gain more from data in real world systems the book Outlines the concepts and rationale for implementing data intensive computing in organizations Covers from the ground up problem solving strategies for data analysis in a data rich world Introduces techniques for data intensive engineering using the Data Intensive Systems Process Engineering Language DISPEL Features in depth case studies in customer relations environmental hazards seismology and more Showcases successful applications in areas ranging from astronomy and the humanities to transport engineering Includes sample program snippets throughout the text as well as

additional materials on a companion website The Data Bonanza is a must have guide for information strategists data analysts and engineers in business research and government and for anyone wishing to be on the cutting edge of data mining machine learning databases distributed systems or large scale computing [AWS Administration - The Definitive Guide](#) Yohan Wadia,2018-03-23 Leverage this step by step guide to build a highly secure fault tolerant and scalable Cloud environment Key Features Learn how to leverage various Amazon Web Services AWS components and services to build a secure reliable and robust environment to host your applications on Delve into core AWS service offerings with hands on tutorials real world use case scenarios and best practices A self paced systematic and step by step guide to learning and implementing AWS in your own environment Book Description Many businesses are moving from traditional data centers to AWS because of its reliability vast service offerings lower costs and high rate of innovation AWS can be used to accomplish a variety of both simple and tedious tasks Whether you are a seasoned system admin or a rookie this book will help you to learn all the skills you need to work with the AWS cloud This book guides you through some of the most popular AWS services such as EC2 Elastic Beanstalk EFS CloudTrail Redshift EMR Data Pipeline and IoT using a simple real world application hosting example This book will also enhance your application delivery skills with the latest AWS services such as CodeCommit CodeDeploy and CodePipeline to provide continuous delivery and deployment while also securing and monitoring your environment s workflow Each chapter is designed to provide you with maximal information about each AWS service coupled with easy to follow hands on steps best practices tips and recommendations By the end of the book you will be able to create a highly secure fault tolerant and scalable environment for your applications to run on What you will learn Take an in depth look at what s new with AWS along with how to effectively manage and automate your EC2 infrastructure with AWS Systems Manager Deploy and scale your applications with ease using AWS Elastic Beanstalk and Amazon Elastic File System Secure and govern your environments using AWS CloudTrail AWS Config and AWS Shield Learn the DevOps way using a combination of AWS CodeCommit AWS CodeDeploy and AWS CodePipeline Run big data analytics and workloads using Amazon EMR and Amazon Redshift Learn to back up and safeguard your data using AWS Data Pipeline Get started with the Internet of Things using AWS IoT and AWS Greengrass Who this book is for This book is for those who want to learn and leverage the rich plethora of services provided by AWS Although no prior experience with AWS is required it is recommended that you have some hands on experience of Linux Web Services and basic networking **Innovations in Smart Cities Applications Edition 2** Mohamed Ben Ahmed,Anouar Abdelhakim Boudhir,Ali Younes,2019-02-06 This book highlights cutting edge research presented at the third installment of the International Conference on Smart City Applications SCA2018 held in T touan Morocco on October 10 11 2018 It presents original research results new ideas and practical lessons learned that touch on all aspects of smart city applications The respective papers share new and highly original results by leading experts on IoT Big Data and Cloud technologies and address a broad range of key challenges in

smart cities including Smart Education and Intelligent Learning Systems Smart Healthcare Smart Building and Home Automation Smart Environment and Smart Agriculture Smart Economy and Digital Business and Information Technologies and Computer Science among others In addition various novel proposals regarding smart cities are discussed Gathering peer reviewed chapters written by prominent researchers from around the globe the book offers an invaluable instructional and research tool for courses on computer and urban sciences students and practitioners in computer science information science technology studies and urban management studies will find it particularly useful Further the book is an excellent reference guide for professionals and researchers working in mobility education governance energy the environment and computer sciences

The Evolution of Business in the Cyber Age Divya Gupta Chowdhry,Rahul Verma,Manisha Mathur,2020-01-06 This book has a two fold mission to explain and facilitate digital transition in business organizations using information and communications technology and to address the associated growing threat of cyber crime and the challenge of creating and maintaining effective cyber protection The book begins with a section on Digital Business Transformation which includes chapters on tools for integrated marketing communications human resource workplace digitalization the integration of the Internet of Things in the workplace Big Data and more The technologies discussed aim to help businesses and entrepreneurs transform themselves to align with today s modern digital climate The Evolution of Business in the Cyber Age Digital Transformation Threats and Security provides a wealth of information for those involved in the development and management of conducting business online as well as for those responsible for cyber protection and security Faculty and students researchers and industry professionals will find much of value in this volume

Cloud Data Management Liang Zhao,Sherif Sakr,Anna Liu,Athman Bouguettaya,2014-07-08 In practice the design and architecture of a cloud varies among cloud providers We present a generic evaluation framework for the performance availability and reliability characteristics of various cloud platforms We describe a generic benchmark architecture for cloud databases specifically NoSQL database as a service It measures the performance of replication delay and monetary cost Service Level Agreements SLA represent the contract which captures the agreed upon guarantees between a service provider and its customers The specifications of existing service level agreements SLA for cloud services are not designed to flexibly handle even relatively straightforward performance and technical requirements of consumer applications We present a novel approach for SLA based management of cloud hosted databases from the consumer perspective and an end to end framework for consumer centric SLA management of cloud hosted databases The framework facilitates adaptive and dynamic provisioning of the database tier of the software applications based on application defined policies for satisfying their own SLA performance requirements avoiding the cost of any SLA violation and controlling the monetary cost of the allocated computing resources In this framework the SLA of the consumer applications are declaratively defined in terms of goals which are subjected to a number of constraints that are specific to the application requirements The framework continuously monitors the application defined

SLA and automatically triggers the execution of necessary corrective actions scaling out in the database tier when required The framework is database platform agnostic uses virtualization based database replication mechanisms and requires zero source code changes of the cloud hosted software applications
