What Causes Industry Agglomeration? Glenn Ellison, Edward Ludwig Glaeser, William Robert Kerr, 2007 Many industries are geographically concentrated Many mechanisms that could account for such agglomeration have been proposed We note that these theories make different predictions about which pairs of industries should be coagglomerated We discuss the measurement of coagglomeration and use data from the Census Bureau's Longitudinal Research Database from 1972 to 1997 to compute pairwise coagglomeration measurements for U S manufacturing industries Industry attributes are used to construct measures of the relevance of each of Marshall's three theories of industry agglomeration to each industry pair 1 agglomeration saves transport costs by proximity to input suppliers or final consumers 2 agglomeration allows for labor market pooling and 3 agglomeration facilitates intellectual spillovers We assess the importance of the theories via regressions of coagglomeration indices on these measures Data on characteristics of corresponding industries in the United Kingdom are used as instruments We find evidence to support each mechanism Our results suggest that input output dependencies are the most important factor followed by labor pooling

What Causes Industry Agglomeration? Evidence from Coagglomeration Patterns Dario Caliendo, 2015-05-05 Studienarbeit aus dem Jahr 2014 im Fachbereich VWL Umweltökonomie Note 1,7 Universität Duisburg-Essen Veranstaltung Applications of Empirical Research Sprache Deutsch Abstract Das Ruhrgebiet stellt als Europas größte Industrieregion ein Paradebeispiel für die Existenz industrieller Ballungsgebiete dar Auffällig dabei ist dass industrielle Agglomerationen immer eine dominante Industrie aufweisen Das Ruhrgebiet repräsentiert die Kohle und Stahlindustrie Hollywood die Filmindustrie und Silicon Valley die IT und High Tech Industrie Dieses Phänomen ist zu stringent als dass man es als reinen Zufall bezeichnen könnte In der Tat ist der Wirtschaftsliteratur gelungen das Phänomen vor allem auf zwei Gründe zurückzuführen Zum einen siedeln sich Firmen die dieselben umweltbedingten Ressourcen benötigen in Orten an welche diese zur Verfügung stellen So wird sowohl der Bootsbauer als auch die Fischerei eine Küstenregion bevorzugen Zum anderen besagen die sogenannten Marshall Theorien dass das Ansiedeln eines Unternehmens neben einer Firma mit ähnlichen Industrieigenschaften zur Reduzierung der Transportkosten von Gütern Personal und Ideen führt Auch wenn diese zwei Theorien in der Literatur wiederholt auftauchen so wird dennoch Literatur vermisst welche die Theorien empirisch verifiziert und sich mit der Beantwortung der Frage beschäftigt Welche relative Bedeutung haben die Marshall Faktoren sowohl untereinander als auch im Vergleich zu den umweltbedingten Faktoren Genau auf diese Frage versucht die vorliegende Arbeit eine Antwort zu finden Denn erst ein detailliertes Wissen über die in Agglomerationen entstehenden Vorteile liefert Unternehmen eine solide Entscheidungsgrundlage für die Standortwahl insbesondere unter Berücksichtigung dass jede Coagglomeration auch Kosten

mit sich bringt und daher ein Trade off zwischen Nutzen und Aufwand darstellt Die Begriffsabgrenzungen in Kapitel 2 bilden die Basis für das Verständnis der Arbeit Der Hauptteil beschäftigt sich zunächst mit einer linearen Regression welche im zweiten Schritt um Instrumentenvariablen erweitert wird um eine umgekehrte Kausalität auszuschließen Das Fazit rundet die Arbeit ab indem es die Erkenntnisse zusammenfasst kritisch würdigt und einen Ausblick verschafft The Spatial Market

Proceedings of the International Conference Theory and Applications in the Knowledge Economy Eduardo Tomé, 2016-07-08 Foreword TAKE 2016 is a dream that came true In about six months a group of friends and colleagues put together in an upcoming and very dynamic university a conference with 9 streams 3 keynotes and 3 special sessions 60 papers presented 6 posters and around 80 participants from 20 countries This is awesome I would like to deeply thank Aveiro University the GOVCOPP research centre the conference committee the keynote speakers the special session convenors the stream leaders the reviewers the authors and the administrative people for all their work and support I want to have two special words one for Blazenka Knezevic without whom the website would not have been possible the other for Gaby Neumann for work in these Proceedings Scientifically TAKE seems to be as important and new and far reaching We don't have shortage of models regarding the knowledge economy but we decisively lack to explore the relation between theory and practice TAKE is a step in exploring that difference We know that Exact sciences find the best answers and social sciences give the best questions J C Spender and we also know that Knowledge Management is more preached by scholars than done by practitioners Aino Kianto We assume the first idea and try to overcome the second Hopefully TAKE 2016 will be a great success Thank you for everything

Trade Openness and China's Economic Development Miaojie Yu, 2019-11-20 With the expansion of globalization international trade has played an increasingly significant role especially for developing countries As the largest developing country China has made a lot of efforts to integrate to the global market since its Open and Reform Policy in 1978 and has become the second largest economy in world So what is the effect of China's trade oriented strategy for the country and the world How did it improve the country's economic development These are some critical questions this book discusses This book utilizes classic Western economic models to examine how China's openness policies have affected the manufacturing upgrading and economic development of the country A large amount of micro level empirical evidence is added to support the conclusion Scholars and students in economics and business will benefit from this book Also it will appeal to readers interested in policy making and Chinese studies

NBER Macroeconomics Annual 2015 Martin Eichenbaum, Jonathan A. Parker, 2016-06-22 This year the NBER Macroeconomics Annual celebrates its thirtieth volume The first two papers examine China's macroeconomic development Trends and Cycles in China's Macroeconomy by Chun Chang Kaiji Chen Daniel F Waggoner and Tao Zha outlines the key characteristics of growth and business cycles in China Demystifying the Chinese Housing Boom by Hanming Fang Quanlin Gu Wei Xiong and Li An Zhou constructs a new house price index showing that Chinese house prices have grown by ten percent per year over the past decade The third paper External and Public Debt Crises by Cristina Arellano Andrew Atkeson and Mark Wright asks why there appear to be large differences across countries and subnational jurisdictions in the effect of rising public debts on economic outcomes The fourth Networks and the Macroeconomy An

Empirical Exploration by Daron Acemoglu, Ufuk Akcigit and William Kerr explains how the network structure of the US economy propagates the effect of gross output productivity shocks across upstream and downstream sectors. The fifth and sixth papers investigate the usefulness of surveys of household beliefs for understanding economic phenomena. Expectations and Investment by Nicola Gennaioli, Yueran Ma and Andrei Shleifer demonstrates that a chief financial officer's expectations of a firm's future earnings growth is related to both the planned and actual future investment of that firm. Declining Desire to Work and Downward Trends in Unemployment and Participation by Régis Barnichon and Andrew Figura shows that an increasing number of prime age Americans who are not in the labor force report no desire to work and that this decline accelerated during the second half of the 1990s.

The Impact Evaluation of Cluster Development

Programs Franco Boneu, David Alfaro Serrano, Alessandro Maffioli, Carlo Pietrobelli, Gabriel Casaburi, Victoria Castillo, Lucas Figal Garone, Elisa Giuliani, David Giuliadori, Andrés Matta, Lucía Pittaluga, Alejandro Rodríguez, 2016-05-02. Do cluster development programs work? Do they fundamentally encourage the essential inter-firm linkages and coordination? Do they lead to innovation and productivity, enterprise development, larger employment and export growth, and if so, after how long? Do other firms benefit from these programs? This book offers insight into quantitative methods that help answer these questions. Cluster development is a form of modern industrial policy that is spreading across the world to help exploit the externalities emerging from geographical agglomeration and inter-firm coordination. Therefore, rigorous impact evaluations are necessary because they help policymakers understand better ways to design future programs and provide accountability for public resources. The chapters argue that enterprise clusters and the programs to support them are diverse and multidimensional processes that require a variety of instruments to be fully understood and assessed. The book as a whole gathers various methodological essays and quantitative tests of complementary tools and approaches, emphasizing their usefulness and effectiveness in coordination with one another. Most importantly, it asserts that policy evaluation is crucial in particular when it comes to cluster development programs to ensure the best use of public resources, the accountability of beneficiaries, and most of all, to feed the necessary learning to improve the design and implementation of public policies for enterprise development.

Innovation and Regional Development in China Ingo Liefner, Yehua Dennis Wei, 2013-07-24. Although China is now the factory of the world, there is no reason to expect that it will always be content with manufacturing labor-intensive goods for foreign corporations. Scholars must now ask: What is the current level of innovation in China? And how can we face this challenge and renovate industrial production and innovation capacities in developed countries? This edited volume investigates the unique characteristics of Chinese innovation and regional development, China's policy framework, and the role that transnational corporations play in China's increasing innovation activities. This book contributes to the heated debate regarding pathways for technology progress and regional development in developing countries and identifies the ways in which local production networks respond to different configurations of external linkages. Linking patterns of global

and local production networks with the trajectories of technology development and regional development allows the authors to theorize and test whether and how particular configurations of production networks generate divergent long term local productivity growth and technological development outcomes Innovation and Regional Development in China will be of interest to geographers economists China specialists development specialists and scholars working on innovation and regional development in developing areas and transition countries

Targeting Regional Economic Development Stephan J. Goetz, Steven Deller, Tom Harris, 2009-03-25 Targeting regional economic development TRED has a long and rich tradition among academic economists and in the world of economic development practitioners This book builds on a series of workshops and papers organized by The Northeast Regional Center for Rural Development NERCRD at the Pennsylvania State University and the Rural Policy Research Centre RUPRI at the University of Missouri Through the coordinated efforts of NERCRD and RUPRI a network of university based researchers and Extension education specialists was developed and provides the foundation of this new edited volume For the first time in a single book Goetz Deller and Harris present an innovative approach through a collection of chapters discussing industry targeting and the relevance of TRED as an important analytical tool for practical targeting purposes The papers present issues surrounding community economic development clusters in industry and rural communities and the role of agglomeration economies The book provides the reader with insights into not only the theoretical foundations of targeting as well as empirical methods but also approaches for using the community level analysis to affect policy directions

Local Clusters in Global Value Chains Valentina De Marchi, Eleonora Di Maria, Gary Gereffi, 2017-07-28 The international fragmentation of economic activities from research and design to production and marketing described through the lens of the global value chain GVC approach impacts the structure and performance of small and medium sized enterprises SMEs agglomerated in economic clusters The consolidation of GVCs ruled by global lead firms and the recession of 2008 09 exacerbated the pressures on cluster actors that based their competitive advantage on local systems spurring an increasing heterogeneity both across and within clusters that is still overlooked in the literature Drawing on detailed studies of different industries and countries Local Clusters in Global Value Chains shows the co evolutionary trajectories of clusters and GVCs and the role of firms and their strategies in organizing manufacturing and innovation activities in the context of ongoing technological shifts The book explores the tension between place based variables and global drivers of change and the possibility for territories containing such clusters to prosper in the new global scenario By adopting insights from the GVC framework and management studies the book discusses how the internationalization strategies of firms create opportunities as well as constraints for adaptive upgrading in clusters This book is of interest to both researchers and policy makers who are interested in the dynamic sources of competitive advantage in the global economy
