Inequality, Democracy, and the Environment Liam Downey, 2015-12-18 Popular Explanations of the Environmental Crisis Inequality Democracy and Macro Structural Environmental Sociology The World Bank the International Monetary Fund and the Environment Modern Agriculture and the Environment Armed Violence Natural Resources and the Environment Restricted Decision Making and U S Energy and Military Policy in the George W Bush Administration Environmental Degradation Reconsidered *Inequality, Democracy, and the Environment* Prakash Kashwan, 2018 This paper engages with the debate about the relationship between inequality and the environment Departing from the past contributions which focused either on the theories of environmental behavior or on economic interests this paper develops arguments about political choice mechanisms that help explain the linkages between inequality and national policymaking related to the establishment of protected areas A cross national analysis of the interactions between inequality democracy and the legal designation of protected areas in a global sample of 137 countries shows that ceteris paribus the effects of inequality vary depending on the strength of democracy in relatively democratic countries inequality is associated with less land in protected areas whereas in relatively undemocratic countries the reverse is true The highly significant effects of inequality undermine the democratic dividend in the arena of nature conservation *Environmental Policy and Air Pollution in China* Yuan Xu, 2020-11-09 This book systematically analyzes how and why China has expectedly lost and then surprisingly gained ground in the quest to solve the complicated environmental problem of air pollution over the past two decades Yuan Xu shines a light on how China's sulfur dioxide emissions rose quickly in tandem with rapid economic growth but then dropped to a level not seen for at least four decades Despite this favorable mitigation outcome Xu details how this stemmed from a litany of policy stumbles within the Chinese context of no democracy and a lack of sound rule of law Throughout this book the author examines China's environmental governance and strategy and how they shape environmental policy The chapters weave together a goal centered governance model that China has adopted of centralized goal setting decentralized goal attainment decentralized policy making and implementation Xu concludes that this model provides compelling evidence that China's worst environmental years reside in the past This book will be of great interest to students and scholars of Chinese environmental policy and governance air pollution climate change and sustainable development as well as practitioners and policy makers working in these fields The Open Access version of this book available at <https://www.taylorfrancis.com/books/9780429452154> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **The Oxford Handbook of Comparative Environmental Politics** Jeannie Lynn Sowers, Stacy D. Toxic Communities Dorceta Taylor, 2014-06-20 Uncovers the systemic problems that expose poor communities to environmental hazards From St Louis to New Orleans from Baltimore to Oklahoma City there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health Due to entrenched segregation zoning ordinances that privilege wealthier communities or because businesses have found the paths of least resistance there are many hazardous waste and toxic facilities in these communities leading residents to experience health and wellness problems on top of the race and class discrimination most already experience Taking stock of the recent environmental justice scholarship Toxic Communities examines the connections among residential segregation zoning and exposure to environmental hazards Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low income and minority communities and shows how they have been dumped on contaminated and exposed Drawing on an array of historical and contemporary case studies from across the country Taylor explores controversies over racially motivated decisions in zoning laws eminent domain government regulation or lack thereof and urban renewal She provides a comprehensive overview of the debate over whether or not there is a link between

environmental transgressions and discrimination drawing a clear picture of the state of the environmental justice field today and where it is going In doing so she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars A fascinating landmark study *Toxic Communities* greatly contributes to the study of race the environment and space in the contemporary United States *The Cambridge Handbook of Environmental Sociology: Volume 1* Katharine Legun,Julie C. identities with dominant institutional practices and the selective promotion of the interests of specific non elite groups This is the first book to argue that violence is both a negative coercive power and a positive productive one that helps produce not only social order but also consent discipline discourse identity subjectivity and embodied knowledge among other things The Violent Underpinnings of American Life is an audacious work that argues violence is absolutely central to social life in America and that Americans cannot effectively fight against the inequalities that surround them without accepting this reality

practices to redress environmental injustices and yet these efforts fall short of meeting the principles that environmental justice activists have fought for In *From the Inside Out* Jill Lindsey Harrison offers an account of the bureaucratic culture that hinders regulatory agencies attempts to reduce environmental injustices It is now widely accepted that America s poorest communities communities of color and Native American communities suffer disproportionate harm from environmental hazards with higher exposure to pollution and higher incidence of lead poisoning cancer asthma and other diseases linked to environmental ills And yet Harrison reports some regulatory staff view these problems as beyond their agencies area of concern requiring too many resources or see neutrality as demanding color blind administration Drawing on more than 160 interviews with interviewees including 89 current or former agency staff members and more than 50 environmental justice activists and others who interact with regulatory agencies and more than 50 hours of participant observation of agency meetings both open and closed door Harrison offers a unique account of how bureaucrats resist undermine and disparage environmental justice reform and how environmental justice reformers within the agencies fight back by trying to change regulatory practice and culture from the inside out Harrison argues that equity not just aggregated overall improvement should be a metric for evaluating environmental regulation Cases on Green Energy and Sustainable Development Yang, Peter, 2019-07-26 Despite the urgent need for action there is a widespread lack of understanding of the benefits of using green energy sources for not only reducing carbon emissions and climate change but also for growing a sustainable economy and society Future citizens of the world face increasing sustainability issues and need to be better prepared for energy transformation and sustainable future economic development *Cases on Green Energy and Sustainable Development* is a critical research book that focuses on the important role renewable energy and energy efficiency play in energy transition and sustainable development and covers economic and promotion policies of major renewable energy and energy efficiency technologies Highlighting a wide range of topics such as economics energy storage and transportation technologies this book is ideal for environmentalists academicians researchers engineers policymakers and students

Decolonizing Environmentalism Prakash Kashwan, Aseem Hasnain, 2024-12-26 We live in a moment rife with mixed emotions existential anxieties about catastrophic climate change presumptuous confidence in planet hacking geoengineering technologies and hopefulness of youth climate activism *Decolonizing Environmentalism* helps us navigate these emotions and reimagine our approach to environmental stewardship The authors cast a critical eye on wealthy and influential environmental groups that committed to anti racist strategies in the wake of the racial awakening of 2020 Yet they continue to embrace false solutions like carbon markets and biodiversity offsets which carry deeply racialized consequences By tracing the roots of these misplaced priorities to detrimental modernity steeped in colonialism and capitalism the authors call for transformational changes in human nature relationships They distil lessons from the divestment movement which has questioned the fossil fuel industry s moral standing and food sovereignty activists who have mobilized global civil society to

hold agribusiness corporations accountable Amidst calls for apocalyptic optimism Kashwan and Hasnain offer a radical vision grounded in intersectional ecofeminism Indigenous sovereignty and strategies honed in the trenches of transnational environmentalism In these extraordinary times Decolonizing Environmentalism invites readers to embark on a transformative journey to embrace anti racist emancipatory and regenerative approaches to environmentalism *Environmental Conflict* Paul Diehl,Nils Petter Gleditsch,2018-03-05 As environmental security gains increasing attention there is a pressing need for rigorous examinations of environmental causes of conflict and the potential for conflict resolution Environmental Conflict explores the role of environmental degradation or scarcity in intrastate or interstate violent conflict and how cooperative efforts might forestall such undesirable consequences By presenting cutting edge conceptual and empirical research examining how environmental factors may influence group and state decisions to employ violence this book enhances understanding of the possibilities for future conflict and how to prevent it **Energy Policy Advancement** Dmitry Kurochkin,Martha J. Crawford,Elena V.
