**Suicide by Proxy in Early Modern Germany** Kathy Stuart, 2023-07-24 Suicide by Proxy became a major societal problem after 1650 Suicidal people committed capital crimes with the explicit goal of earning their executions as a short cut to their salvation Desiring to die repentantly at the hands of divinely instituted government perpetrators hoped to escape eternal damnation that befell direct suicides Kathy Stuart shows how this crime emerged as an unintended consequence of aggressive social disciplining campaigns by confessional states Paradoxically suicide by proxy exposed the limits of early modern state power as governments struggled unsuccessfully to suppress the tactic Some perpetrators committed arson or blasphemy or confessed to long past crimes usually infanticide or bestiality Most frequently however they murdered young children believing that their innocent victims would also enter paradise The crime had cross confessional appeal as illustrated in case studies of Lutheran Hamburg and Catholic Vienna

**Cultures of Abortion in Weimar Germany** Cornelia Usborne, 2007-12-01 Abortion in the Weimar Republic is a compelling subject since it provoked public debates and campaigns of an intensity rarely matched elsewhere It proved so explosive because populationist ecclesiastical and political concerns were heightened by cultural anxieties of a modernity in crisis Based on an exceptionally rich source material e.g. criminal court cases doctors case books personal diaries feature films plays and literary works this study explores different attitudes and experiences of those women who sought to terminate an unwanted pregnancy and those who helped or hindered them It analyzes the dichotomy between medical theory and practice and questions common assumptions i.e. that abortion was a necessary evil which needed strict regulation and medical control or that all back street abortions were dangerous and bad Above all the book reveals women's own voices frequently contradictory and ambiguous having internalized medical ideas they often also adhered to older

Lomperis, 2025-04-22

The sixteenth century witnessed unprecedented reformations in both religious belief and medical knowledge marked by the rise of Protestantism the Catholic reform movement and the new approaches to the study of human anatomy laying the groundwork for the emergence of evidence based medicine The Reformations of Medicine investigates the transformations of religious perspectives on medicine and healing during this era with a particular focus on Martin Luther s thought Lomperis explores the implications of these early modern developments for current intersections of spirituality and healthcare The study reveals how early Protestants reimagined the spiritual significance of medicine It illuminates previously little studied aspects of Luther s theological thought concerning physical suffering Lomperis argues that Luther pursued a spiritual reformation of approaches to medicine and healing informed by his theology of created means and idolatry She demonstrates that Luther s theology challenged the long standing tradition of viewing natural healing through medicine as spiritually inferior to supernatural divine healing Lomperis develops strategies utilizing early modern thought as a resource for navigating the complexities of suffering in contemporary medical contexts addressing religiously motivated suspicion of scientific medicine and engaging Christian spiritualities of healing to promote more equitable healthcare systems With rigorous historical research and erudite contemporary analysis this book provides an innovative exploration of early modern religious approaches to medicine and offers novel insights into the enduring interactions between medicine spirituality and religion      **The Routledge History of Women in Early Modern Europe** Amanda L.

The Peace of Augsburg and the Meckhart Confession Adam Glen Hough, 2019-03-06 Taking the religiously diverse city of Augsburg as its focus this book explores the underappreciated role of local clergy in mediating and interpreting the Peace of Augsburg in the decades following its 1555 enactment focusing on the efforts of the preacher Johann Meckhart and his heirs in blunting the cultural impact of confessional religion It argues that the real drama of confessionalization was not simply that which played out between princes and theologians or even for that matter between religions rather it lay in the daily struggle of clerics in the proverbial trenches of their ministry who were increasingly pressured to choose for themselves and for their congregations between doctrinal purity and civil peace

**Writing British Infanticide** Jennifer Thorn, 2003 Writing British Infanticide tracks the ways that the circulation of narratives of child murder in eighteenth and nineteenth century Britain shaped perceptions and punishments of the crime and more elusively hierarchies of class and gender The essays brought together in this volume pose the question How are we to understand the proliferation of writing about child murder in eighteenth and nineteenth century Britain the overlap of an expanding print culture with the widely evident narration of this particular crime Further what are we to make of the recurrent and remarkably consistent representation of child murder as the special province of unmarried desperate women Focussing on specific instances of the transformative effect of the circulation of narratives of child murder Writing British Infanticide takes as its purview not child murder per se but the ways that writing about its credentialed and differentiated writers in different but often overlapping genres and moments in a key period in the expansion of print Jennifer Thorn is an Assistant Professor of English at Duke University

**Parricide and Violence against Parents** Marianna Muravyeva, Phillip Shon, Raisa Maria Toivo, 2020-12-30 Parricide and Violence Against Parents takes a historical and criminological approach to the research on parricide and violence against parents placing the research in the context of social development from the 1500s to contemporary society and giving a global overview and comparison The book examines parricide and violence against parents as historically and culturally sensitive phenomena It offers evidence on a seemingly rare subject from different eras areas and cultures and then uses the cross disciplinary data to produce a new systematic insight for the reader Case studies shift the discussion from the contemporary focus on adolescent to parent abuse to examining the sources of conflict during life cycles of parents and their offspring A historical approach illuminates the variations in conflicts between parents and their offspring that are shaped by the life stages of the victims and offenders themselves across time The book argues that parental authority has been marked by property ownership and tax paying responsibilities throughout history The continued possession of property resulted in power the reluctance to part with it becoming a notable source of conflict across generations within families Parental authority was protected by means of heavy penalties and punishments and didactic teachings in almost every society at every stage of historical development It was also challenged constantly by children as a part of their coming into adulthood The abuse of parents has often been connected to situations where adult children were prevented from gaining the amount of independence appropriate to their position in life This led to disputes over authority and the legitimate grounds for that authority Offering an insight into complicated and interconnected histories of generational conflicts and how they affect modern families in different parts of the world this book will be of great interest to students and scholars of criminology history of crime history of the family family violence homicide studies gender studies history of emotions political violence and social work
